

1. If algae growth is visible add one gallon KLIX ALGICIDE FOR each 10,000 gallons of water to kill growth.
2. When existing growth is dead as seen by change in color of the water, clean pool, draining and refilling if necessary.
3. Add one gallon Klrix ALGICIDE per 50,000 gallons of water applied every 5 to 7 days, as necessary to maintain between 2 and 5 parts of active ingredients per million parts of water. See serviceman for test kit.
4. If algae growth is absent, use one gallon KLIX ALGICIDE for each 50,000 gallons of water every 7 to 10 days

DISINFECTION

BEFORE DISINFECTING, wash thoroughly all articles, fabrics, and surfaces with a suitable detergent. RINSE thoroughly.

1. Mop floor and runways with solution containing 3/4 ounce KLIX ALGICIDE per gallon of water.
2. Immerse suits and caps for ten minutes in solution containing one ounce KLIX ALGICIDE per gallon of water. RINSE THOROUGHLY. Wring and hang to dry.

ALGICIDE FOR SWIMMING POOLS

Ingredients
 Alkyl (C₁₂-50%, C₁₂-40%, C₁₂-10%)
 Dimethyl Benzyl Ammonium
 Chlorides 1.25%
 Inert Ingredients 2.75%
 Coefficient (AOAC Method, 25°C)
 Typhosa 58
 Staphylococcus var. Aureus 75

CAUTION: Keep Out Of Reach Of Children,

Harmful if swallowed. Avoid contact to skin & eyes. In case of contact flush with plenty of water. If irritation persists get **MEDICAL ATTENTION**. Avoid contamination of foods. Rinse and dispose of container when empty.

KLIX Chem *Callomp*

The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor and increased chlorine demand of the water. The use of KLIX ALGICIDE will help to maintain the water in a clean condition.

KLIX ALGICIDE is compatible with the usual water treatment chemicals. Algal growth is often controlled by KLIX ALGICIDE when copper sulfate fails. No change in use of the flocculating chemicals, alkalizers, or chlorine is generally necessary.

KLIX ALGICIDE is non-toxic and non-irritating in use dilutions
