DIRECTIONS

To disinfect floors, walls, lavatories, restrooms, sinks, glass, etc., dilute 4 ounces to a gallon of water. Before applying Lime-Ette disinfectant, the area and surfaces will be thoroughly wet. Should be washed free of loose dirt and the disinfecting solution applied so as to wet the surface thoroughly.

As a deodorant spray use 4 ounces to a gallon of water.

At a dilution of 3 ounces per gallon of water, is a recommended fungicidal solution, for scrubbing shower room floors, locker room benches, mats and other surfaces commonly contacted by the bare feet, to aid in preventing the spread of Athlete's foot fungi.
