### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

TIM-BOR is a water soluble inorganic borate salt for the protection and treatment of lumber against decay fungi and wood boring beetles including Powder Post Beetles (*Lyctidae*), Furniture Beetles and Old House Borers (*Anobiidae*), and Longhorn Beetles (*Cerambycidae*). This treatment is not effective against wood staining fungi and may require mixing with compatible products. TIM-BOR also controls Subterranean Termites (*Reticulitermes*, *Coptotermes*), Dampwood Termites (*Zootermopsis*) and Drywood Termites (*Kaloterms*, *Incisitermes*).

TIM-BOR is recommended for all interior and exterior wood which will be protected from rain and not in direct contact with soil. The treatment of lumber is permanent even after cutting and finishing providing the wood is not exposed to moisture or in contact with the soil.
