

**PREPARATION OF TREATMENT SOLUTION**

Apply the amount of TIM-BOR<sup>®</sup> needed for treatment to a clean bucket of water and mix added to the tank to give a 1% concentration. Some additional required amount of water may be added. TIM-BOR<sup>®</sup> is then gradually added to the water, creating a treatment solution that is required. The amount of water added and the amount of TIM-BOR<sup>®</sup> added is the amount of the product.

**REMEDIAL AND PREVENTATIVE TREATMENT**

For remedial and preventative treatment of wood, apply the treatment solution to the wood surface. The solution will penetrate the wood and kill the insects. The solution will also prevent the wood from being infested by insects in the future.

For preventative treatment of wood, apply the treatment solution to the wood surface. The solution will penetrate the wood and prevent the wood from being infested by insects in the future.

**PRE-TREATMENT**

Apply the treatment solution to the wood surface. The solution will penetrate the wood and kill the insects. The solution will also prevent the wood from being infested by insects in the future.
