## BIOBOR® DIESEL DOCTOR™

### POWERFUL REMEDY FOR DIESEL SLIME & SLUDGE.

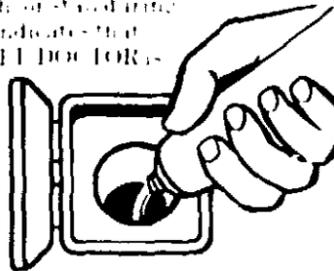

Your diesel engine is special. It's designed for greater fuel economy than a gasoline engine, and to last up to four times as long. But Diesel Slime & Sludge can stop a diesel engine short. It's caused by the billions of tiny bacteria and fungi that don't proliferate in gasoline, but love to grow in your diesel fuel. Without treatment, Diesel Slime & Sludge can destroy fuel economy and damage expensive parts in your fuel system. Since diesel economy comes from increased mileage, not fuel cost, it makes sense to spend a few cents more per gallon to protect your diesel engine from damage. BIOBOR DIESEL DOCTOR is the best remedy for Diesel Slime & Sludge.

### BEWARE OF THE SYMPTOMS.

The bacteria and fungi that grow in diesel fuel can produce a by-product acid inside your fuel tank and lines. This acid can corrode and damage your engine's vital parts: the expensive high pressure fuel pump, injector tips, tank lines and hardware. The moisture, sludge, the acidic by-products, and acid that will clog your fuel lines and filters. When that happens, your diesel loses performance and may stop running, and you'll be paying for expensive repairs. Watch for missing fuel, a drop in power, a rise in exhaust, and stalling. Those symptoms may be warning you of Diesel Slime & Sludge. BIOBOR DIESEL DOCTOR can help solve the problem, and will control its recurrence.

### THE TREATMENT IS EASY. Directions:

For proper results, we recommend a double dose of BIOBOR DIESEL DOCTOR. Add a 1/2 ounce to treatment will help control any severe contamination that exists in the fuel in the system. If your diesel already has a severe buildup of water in it, the engine may lose power, run rough, or stall during the first few miles after the addition. This merely indicates that

contaminated fuel is a problem, and BIOBOR DIESEL DOCTOR is working to solve it. Please drain your fuel system if water is being trapped by the fuel filters. If you get treatment for a second time, repeat the treatment at the expense of your oil. The sludge that is trapped by the fuel filters will be carried to the bottom of the tank. If you get the treatment for a second time, you will see the sludge that is trapped by the fuel filters.

BIODOR DIESEL DOCTOR is available in 1/2 gallon and 1 gallon sizes. Keep the cap on the 1/2 gallon BIOBOR DIESEL DOCTOR container until you are ready to use it. U.S. Borax Company, Inc.
