

SUGGESTED USE:

Place 4 ounces or more of contents of this package in locations frequented by rats and mice and protect from children, dogs, cats and livestock by means of bait boxes or cages where necessary. KNOX WARFARIN should be replenished as consumed. Use no decomposed, moldy or sour bait.

Where a continuous source of infestation prevails from nearby dumps or fields, permanent bait stations should be used and KNOX WARFARIN replenished as needed. THIS BOX MAY BE USED AS A BAIT STATION. Protect as suggested in above paragraph. See directions at bottom of carton.

IMPORTANT NOTICE

BAITING SHOULD CONTINUE UNTIL COMPLETE LACK OF FEEDING IS NOTED. THIS SHOULD BE FROM FIVE TO FOURTEEN DAYS.

Be sure that sufficient KNOX WARFARIN is at hand to complete a continuous 14-day feeding program. If KNOX WARFARIN is exhausted before rats or mice have been completely eliminated, it is important to obtain additional KNOX WARFARIN promptly and avoid a delay of more than 1 or 2 days in the feeding program. Continuous, uninterrupted feeding is what gives you control.

MICE: To control mice follow the same general directions as for rats except bait placements may be smaller and more placements should be made. Mice are more difficult to control than rats and complete control may take a longer period of baiting.

CAUTION: KNOX WARFARIN contains as its active ingredient an anti-coagulant chemical which if taken accidentally by humans, domestic animals, or pets may reduce the clotting ability of the blood and serious hemorrhage may result. In case baits are accidentally eaten, give a tablespoonful of salt in a glass of warm water and repeat until vomit fluid is clear. Call a physician immediately.

NOTE FOR PHYSICIANS: When a human has been known to have accidentally ingested KNOX WARFARIN, blood transfusions with intravenous injections and oral doses of Vitamin K are indicated as in the case of hemorrhage caused by overdoses of Dicumarol.

To use as bait station cut carton and inside bag on perforated lines to permit easy feeding.

CAUTION - Always place WARFARIN baits where they are not available to humans, domestic animals and pets.
