

[1660-58]

U.S.D.A. Reg. No. 1660-58

### DIRECTIONS

Crawling Insects: (Roaches, Waterbugs, Bedbugs, Ants, Silverfish, Spiders). Spray wherever insects might be hiding such as under sinks, stoves, drain boards, in cracks, on baseboards, crevices, around door sills, pipes, window frames, refuse areas, storage areas. For Bedbugs thoroughly spray bed and mattress as well. Where possible contact insects directly with spray.

Flying Insects: (Flies, Mosquitoes, Gnats, Wasps, and other small flying insects.) Remove pets, birds, and fish from room before spraying. Close doors and windows and direct spray to all parts of room with sweeping circular motion. Hit insects directly where possible. Keep room closed for 15 minutes after spraying.

Clothes Moths and Carpet Beetles: Woolens should be cleaned and brushed thoroughly before spraying. Spray garments thoroughly from distance of about 2 feet paying particular attention to folds, and seams. Dampen surfaces of clothing receptacles; let dry. Do not spray on plastic or synthetic surfaces. Repeat monthly if articles are not stored in moth-tight containers.

HOME AND INSTITUTIONAL PANTRIES AND FOOD ESTABLISHMENTS frequently become infested with various stored food pests including flour beetles, weevils, cadellas, grain beetles, meal worms, spider beetles, meal moths, skippers, grain and cheese mites. To avoid sources of re-infestation, wormy flour, grain and cereals should be destroyed before treatment. To kill exposed stages, spray thoroughly all surfaces of shelves, bins, cupboards, cabinets, pantries, lockers and similar storages, with particular attention to cracks, niches, crevices and other hiding places.
