NEW! STAINLESS-LEAVES NO ODOR
IMPROVED POWERFUL FORMULA

Spray from the container as directed for best results. When the coating left will often give the best control for the methods of

FLAMMABLE MIXTURE

DO NOT SMOKE WHEN SPRAYING. DO NOT USE, NOR STORE NOR EXPOSE NEAR SOURCES OF HEAT OR OPEN FLAME. Never throw container into fire or incinerator. Do not place in direct sunlight. Temperatures exceeding 120°F may cause container to burst.

DIRECTIONS FOR USE

ROACHES - Don't close up room. Never spray into air. Lift protective cap. Press trigger. Hold container so that spray is directed at the surface to be sprayed at a distance of 6 inches to 1 foot. All spraying to be on spot basis. Spray until surface is wet usually at the rate of 1 to 2 feet per second. Spray directly into un-tilted cracks, crevices, behind sinks, stove, refrigerator. Make sure pilot lights off on stove or refrigerator. Go dry. Do not get clothes from closet or bins. Spray until dry. Spray less than 1 foot dry. This thorough application is effective for long-termable periods of time (up to 2 years) to apply if reinfestation due to migration or other causes occurs. The residual material left by the above treatment is not easily swept away. For thoroughness, to reach housecleaning with soap and water, removes the residue after sufficient time.

ANTS - As for Roaches, spray into all possible ant trails, into and under baseboards, under doorills, window frames, water pipes, heat ducts, electrical outlets, and baseboards, wherever it is necessary to reach source of infestation. When used outdoors, spray into all possible trails.

WATERBUGS - Spray from the container directly on the pest. For best results, spray on the pest.

SPRAY COATING
Positively!

**ANTS, SILVERFISH, WATERBUGS,
BROWN DOG TICKS IN PREMISES**

GUARANTEED EFFECTIVE

**CAUTION: KEEP OUT OF REACH
OF CHILDREN. FLAMMABLE
