DIRECTIONS FOR USE

ROACHES:

Dro Professional Brand Kills roaches by contact and when they crawl over surfaces which have been treated with Dro. Spray or brush on a spot basis only, directly into infested cracks, crevices, tunnels, legs of tables. Apply locally where insects hide, run or rest. While Dro is not swept or wiped away easily, nevertheless soap and water removes film, so reapply after housecleaning. Do not allow children to contact treated surfaces until surfaces are dry. When applying make sure pilot light is off on stove or refrigerator; electricity on electric stove also must be off.

FOR ANTS:

Use as for roaches. For subterranean ants, pour directly into cracks and on colonies. Treat ant trails and areas around door sills and window frames, openings around water pipes, heat ducts, electrical outlets and base board, repeating as often as necessary to maintain effective control.

WATERBUGS, SILVERFISH AND SPIDERS:

Spray directly on insects if possible or as for Roaches. Also on exposed pipes.

BROWN DOG TICKS IN PREMISES:

As for Roaches, also repeated treatments as necessary depending on source and intensity of infestation, around baseboards, windows and door frames, localized areas of floors and floor coverings, wall cracks and sleeping quarters of pets. Replace fresh bedding in animal quarters following treatment. Do not treat pets or other animals. Apply this product only as specified on this label.
