DIRECTIONS
FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling

Copy J

Grant's Ant
Control System

contains a special formula that attracts scout ants seeking food for their colony. They take the poison back home, where it is eaten by both the queen and worker ants. The colony stops reproducing and begins to die. The weakened or destroyed colony can no longer infest your home. GRANT'S should be placed label side up under sinks, behind appliances and in ornamental potted plants. This product should not be placed in locations accessible to children. This includes ornamental potted plants.

Copy K

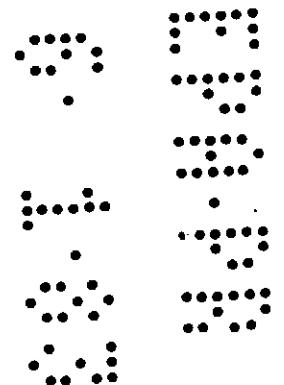

To Activate:

Punch hole in cover of container with nail, wood match or toothpick. To increase effectiveness, wet top of container with hot water.

GRANT'S starts to work immediately. Some ants die in hours. Larger colonies may take up to a week or longer. GRANT'S continues to work for you until all the poison is taken away by the ants. For continuing protection, replace every three or four months or when container is empty.
