

THOROFARE treatment is like sunning and airing, yet the action is more powerful and rapid. Like the sun, THOROFARE gives your laundry that fresh fragrance of outdoors. THOROFARE means death to many germs that lurk in the dark-germs that die when exposed to strong sunlight or to THOROFARE bleach. In fact, you may call it bottled sunshine!

#### LAUNDRY

THOROFARE BLEACHES white cottons and linens to snowy newness; THOROFARE DEODORIZES, makes clothes fresh and sweet smelling; and THOROFARE REMOVES STAINS at the same time (for stubborn stains, see below).

Soaking and Washing Suds - 1 tablespoonful THOROFARE bleach to one gallon of water. Mix well, add soap or detergent. Immerse laundry, wash or soak, and rinse. When laundry is placed in washer before water is added, as in some automatic machines, put recommended amount of THOROFARE in one quart of water, mix well, then add this to washer after laundry has been immersed.

Rinse Water - Use the above amount of bleach and soak laundry for fifteen minutes, then rinse.

#### STUBBORN STAINS

THOROFARE removes a variety of stains from white fabrics. Stains that remain after laundry bleaching may be removed by a stronger solution of THOROFARE.

2 tablespoonfuls THOROFARE bleach in one quart of water. Soak fabric in cold water for ten to fifteen minutes, immerse in THOROFARE solution for five to fifteen minutes, then rinse well in clear water. Repeat if necessary. Any remaining spots will probably be removed by lemon juice or vinegar.

DISTRIBUTED BY  
THOROFARE MARKETS, INC.  
PITTSBURGH, PA.

#### REFRIGERATORS, SINKS, TILE, BATHTUBS, GARBAGE CANS

3 tablespoonfuls THOROFARE bleach to one quart of water. A stronger solution can be used. First thoroughly wash item, then keep wet for five minutes with THOROFARE bleach solution, rinse, dry and air. (In order to keep bleach solution from running down smooth surfaces of refrigerators, etc., add detergent to THOROFARE solution.)
