CONTROL AGENT FOR MICRO-ORGANISMS

ACTIVE INGREDIENT:

Disodium ethylene bis(dithiocarbamate)..... 22.0%

INERT INGREDIENT:.....78.0%

APPLICATION:

Magnicide 16 is best added by the slug method to the troubled areas of paper mills. It is used in a dosage range of ½ to 1½ lbs. (6.7-20.2 fluid ounces) per ton of dry pulp for the control of gram negative and positive bacteria and various types of molds and yeasts which contribute to slime problems encountered in paper mill systems. Intermittent or continuous feeding to the white water, the beaters, hydro-pulpers, etc., can also be used. Technical assistance regarding specific site problems is available from our representative.

CAUTION:

Alkaline — Harmful if swallowed. Avoid contact with skin and eyes. May cause skin irritation. In case of contact with skin and eyes, flush with copious amounts of water and consult a physician immediately.

Keep from freezing — store indoors.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, ponds, or streams. Treated effluent waters may be harmful to fish and other aquatic life.

Drum is not returnable. Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place.
