DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SANI-GLIDE is specially formulated for environmental sanitation of conveyors in the dairy, beverage and food processing industries.

SANI-GLIDE contains a multiple phenolic system active as a sanitizer against gram positive and gram negative bacteria including the pathogenic organisms *Listeria monocytogenes* and *Salmonella typhimurium* on inanimate, non-food contact surfaces.

SANI-GLIDE provides exceptional lubricity and superior cleaning ability at high use dilutions. SANI-GLIDE keeps conveyors free of slime and soil buildups.

For best results, spray-clean conveyors with a suitable detergent to remove soil and slime buildup. Spray-apply a 1% by volume (1 1/4 ounce to 1 gallon of water) dilution of SANI-GLIDE in water through standard conveyor lubricant spray nozzles using a conveyor lubricant dispensing system such as the Klenzade LUBRI-KLENZ[®] 260, Super KLENZ-JECT[®] or MIKRO MASTER[®] 300. Allow a minimum of 5 minutes contact time.

No need to rinse with potable water or remove product as SANI-GLIDE can be continuously applied to conveyors to prevent slime and soil buildup.

SANI-GLIDE is effective in water up to 150 ppm hardness as calcium carbonate (9 grains per gallon) at 1% by volume.

STORAGE AND DISPOSAL:

DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL.
PESTICIDE DISPOSAL:

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional office for guidance.

CONTAINER DISPOSAL

Triple rinse or equivalent. Then offer for recycling or reconditioning or puncture and dispose of in a sanitary fill or by other procedures approved by State or local authorities.
