DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. *SANI-GLIDE* is specially formulated for ~~environmental~~ sanitation of conveyors in the dairy, beverage and food processing industries.

SANI-GLIDE contains a multiple phenolic system active as a sanitizer against the pathogenic organisms *Listeria monocytogenes* and *Salmonella typhimurium*, on inanimate, non-food contact surfaces.

~~*SANI-GLIDE* provides exceptional lubricity and superior cleaning ability at high use dilutions.~~
SANI-GLIDE keeps conveyors free of slime and soil buildups.

PRE-CLEAN: For best results, spray-clean conveyors with a suitable detergent to remove soil and slime build up. **SANITIZE:** Spray-apply a 1% by volume (1 1/4 ounce to 1 gallon of water) dilution of *SANI-GLIDE* in water through standard conveyor lubricant spray nozzles using a conveyor lubricant dispensing system such as the Klenzade Lubri-Klenz 260, Super Klenz-Ject or Mikro Master 300. Allow a minimum of 5 minutes contact time. No need to rinse with potable water or remove product as *SANI-GLIDE* can be continuously applied to conveyors to prevent slime and soil buildup. *SANI-GLIDE* is effective in water up to 150 ppm hardness as calcium carbonate (9 grains per gallon) at 1% by volume.

Not to be used on food contact surfaces.
