A. Batch systems with no makeup water added:

2. Ensure that water is recirculating in vessel.

B. Continuous systems with constant addition of makeup water:

1. Fill vessel containing fruits or vegetables with known amount of water.

Initial dose: (this brings the recirculating process water up to an initial dosed level of KX-6078).

1. Ensure that system is recirculating with known amount of water in vessels and piping.

Continuous dose: (ensures steady state dosing of KX-6078 is maintained)
