A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. Pursuant to 40 CFR 156.10(a)(6), you must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process, FIFRA section 12(a)(1)(B). Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Assurance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Terria Northern via email at northern.terria@epa.gov.

GENERAL DIRECTIONS FOR USE WITH ELECTROSTATIC SPRAYING

Remove by-standers and pets from the area to be treated. Do not use for treatment of humans, air, or for fumigation. Spray droplet particle size should be set to a limit median diameter of $\geq 40\mu\text{m}$. Use N95 filtering facepiece respirators or half face respirators with N95 filters. Plan the spray routine to minimize unnecessary exposure to treated areas [for example, begin applying product in the back of the room/area and work towards the front of the room/area]. Place the electrostatic spray function in the ON position for electrostatic spray models that have the functionality to toggle ON/OFF. See OSHA's Respiratory Protection Standard for federal requirements on how to safely fit-test, train, and medically examine workers who will be using respirators.

FOR USE AS A [MULTI SURFACE] [ONE-STEP] CLEANER, DISINFECTANT, AND VIRUCIDE BY ELECTROSTATIC SPRAYING

To disinfect hard, non-porous surfaces, apply use solution with electrostatic sprayer. Spray approximately 6 to 12 inches from the surfaces; making sure to visibly wet surfaces thoroughly. All surfaces must remain visibly wet for the required contact time indicated in the hard surface disinfection Table [C] [Hard, Non-Porous Surface Disinfection [by Spray Application]], reapplying if

necessary. Wipe or let air dry. For visibly soiled areas, pre-cleaning is required. When using on food contact surfaces, thoroughly rinse all treated surfaces with potable water.

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST *HIV-1, *HBV, AND *HCV OF SURFACES/ OBJECTS SOILED WITH BLOOD/BODY FLUIDS

Personal Protection: When handling items soiled with blood or body fluids, use disposable impervious gloves, gowns, masks, and eye coverings.

Cleaning Procedure: Blood and other body fluids must be thoroughly cleaned from surfaces and other objects before application of this product. This cleaning may be accomplished with any cleaning solution, including this product.

Contact Time: Apply [this product] [insert product name] by [hand pump] [coarse] [trigger][pressurized] sprayer [6-8 inches from surface] to visibly wet the surface. Allow surface to remain visibly wet for 30 seconds to kill HIV-1, HBV and HCV.

Disposal of Infectious Materials: Blood and other body fluids must be autoclaved and disposed of in accordance with federal, state, or local regulations.

TO CLEAN AND DISINFECT HARD, NON-POROUS NON-FOOD CONTACT SURFACES IN VETERINARY APPLICATIONS:

Remove all animals and feeds from premises, animal transportation vehicles, crates, etc. Remove all litter, droppings and manure from floors, walls and surfaces of facilities occupied or traversed by animals. Empty all feeding and watering appliances. Visibly wet surfaces with product and surfaces must remain visibly wet for the required contact time. Ventilate buildings and other closed spaces. Do not house animals or employ equipment until treated surfaces have been thoroughly rinsed with potable water and allowed to dry.

FOR CLEANING AND DISINFECTING HARD, NON-POROUS SURFACES IN ANIMAL HOUSING FACILITIES [BARN, KENNELS, CAGES, HUTCHES, ETC]:

Remove all animals and feeds from facility. Remove all litter, waste matter, and gross soils. Empty all feeding and watering appliances. Apply product to surfaces and let stand for the required contact time. Saturate all animal handling and restraining equipment as well as tools used to remove litter and manure. Ventilate buildings and other closed spaces. Do not house animals or employ equipment until treated surfaces have been thoroughly rinsed with water and allowed to dry. Thoroughly scrub all treating, feeding, and watering appliances with soap or detergent, and rinse with potable water before re-use.

SALON / BARBER INSTRUMENTS AND TOOLS DISINFECTION [BACTERICIDE] / VIRUCIDE

DIRECTIONS:

Spray combs, brushes, plastic rollers, manicure and other salon instruments and tools. Allow them to remain visibly wet for the contact time indicated for hard surface disinfection. For visibly soiled instruments and tools, a preliminary cleaning is required. Rinse thoroughly and dry before use. **Note:** Stainless steel shears and instruments must be rinsed and dried and kept in a clean, non-contaminated receptacle. Prolonged contact with the disinfectant solution may cause damage to metal instruments.

For immersion of tools, completely immerse precleaned combs, brushes, rollers, manicure and other salon instruments and tools for 10 minutes. Rinse thoroughly and dry before use. Prepare a fresh solution daily or more often if the solution becomes visibly diluted, cloudy, or soiled. Note: Plastics may remain immersed until ready to use. Stainless steel instruments must be removed after 10 minutes, rinsed, dried and kept in a clean, non-contaminated receptacle. Prolonged soaking may cause damage to metal instruments.
