

Active Ingredient	
Phosphoric acid	22.00%
Sodium Dodecylbenzene sulfonate	2.75%
Inert Ingredients	75.25%
(contains a non-ionic detergent)	

PROPERTIES:

Form	Liquid	Pounds Per Gallon	9.5
Color	Yellow	pH 1.0% Solution	2.2
Odor	Aromatic	pH 0.1% Solution	2.0
Foam	High	Acidity calculated as	
Wetting Ability	Excellent	phosphoric acid	22.00%
Specific Gravity @ 68°F	1.142		

Contains not more than 7.0% phosphorus, 1.15 grams per gallon of average recommended use concentration.

USE:

For sanitation of dairy and food processing equipment, clean and then rinse equipment with hot (145°F.) water. Then sanitize just before using equipment with 1 ounce K-San to 2 gallons of water (providing 100 ppm sodium dodecylbenzene sulfonate). All surfaces should be exposed to the sanitizer for a period of not less than 2 minutes.

SAFETY:

Rinse empty container thoroughly with water and discard.

PRECAUTIONS:

DANGER

Keep out of reach of children. Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol.

Call a physician immediately.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

ACCEPTABILITY:

K-SAN is registered with the Environmental Protection Agency.

EPA Reg. No. 1677-56

K-SAN is authorized by the U.S. Department of Agriculture for use in Federally Inspected Meat and Poultry Plants as a sanitizer for all surfaces. Before using this compound, food products and packaging material must be removed from the room or carefully protected. After using this compound, surfaces must be thoroughly rinsed with potable water before operations are resumed.

Directions:

THIS DISINFECTANT IS TO BE USED IN JANITORIAL
MAINTENANCE ON FLOORS, WALLS AND WOODWORK
IN BOTH COMMERCIAL AND INDUSTRIAL AREAS. CAN
ALSO BE USED IN HOMES, HOTELS, MOTELS AND
SCHOOLS.

As an aid in ordinary disinfection against S. Typhosa wash
contaminated area with solution A. To aid in disinfection of
URINALS and TOILETS - remove residual bowl water from
toilet bowls, clean daily with solution A. Remove gross filth
and heavy soils from surfaces prior to disinfection. Wash toilet
seats, vessels and floors making sure entire surfaces are thor-
oughly wetted. Utilize solution by pouring down drains, in this
way deodorizing traps and drains.

For GARBAGE CANS and RECEPTACLES: Wash all surfaces
freely with solution A.

FOR CLEANING AND DEODORIZING WHERE
DISINFECTION IS NOT DESIRED.

GENERAL CLEANING - Prepare solution B and use regularly
for mopping floors, washing woodwork, walls, sinks, refrigerators,
and in basements.

DILUTION TABLE

Solution A - Mix 1 part Disinfectant with 60 parts water.

(2 ounces to 1 gallon of water)

Solution B - Mix 1 part Disinfectant with 200 parts water.

(2 ounces to 3 gallons of water)

CAUTION: Harmful if swallowed. If swallowed, do not
induce vomiting. Vomiting may be harmful. Drink milk, gruel
or cornstarch paste. Call a physician immediately. Avoid getting
in eyes, or on skin. In case of eye contact, wash thoroughly
with water. If eye irritation persists, get medical aid.

Rinse empty container thoroughly with water and discard it.
Avoid contamination of food.
