

STATE FORMULA 300

SWIMMING
POOL

ALGAEICIDE

For the control of Algae in swimming pools

ACTIVE INGREDIENT:

Poly (oxyethylene (dimethylimino) ethylene
(dimethylimino) ethylene dichloride) 10.0%

INERT INGREDIENT 90.0%

TOTAL 100.0%

Weight per gallon — 8.49

Weight of active ingredient per gallon 0.85

EPA Reg. No. 1685-75

FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY

CAUTION:

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Do not get in eyes. Avoid contact of concentrate with skin. In case of contact with eyes flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.

Rinse empty container thoroughly with water and discard the container.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label.

Formula 300 Swimming Pool Algaecide is a concentrated product and should be diluted to required concentration for effective control of algae in swimming pools.

DIRECTIONS

For maximum effectiveness, pools containing heavy algae growth should be cleaned prior to using Formula 300.

For pools having just visible algae growth, add an initial dose of 75 to 115 fl. oz. (about 4½ to 7 pints) of Formula 300 per 10,000 gallons of water. Remove settled algae by cleaning.

For treatment of a freshly cleaned and filled pool, add initial dose of 40 to 75 fl. oz. (about 2½-4½ pints) of Formula 300 per 10,000 gallons of water.

To maintain pools free of visible algae growth, subsequent additions of 14-28 fl. oz. of Formula 300 per 10,000 gallons of water should be made every 5-7 days after the initial treatment.

Uniform distribution of Formula 300 Swimming Pool Algaecide throughout the water in the pool is necessary for maximum effectiveness.

Formula 300 is compatible with those chemicals normally used to treat pools and is effective at both acid and alkali PH. Formula 300 can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. Do not mix Formula 300 with concentrated dry or liquid chlorine products.
