DIRECTIONS FOR USE

RMK-308 Rodenticide can be used in wet or damp locations, such as river banks, railroad tracks, loading areas, under pavements, along fences, garbage dumps, in ware product areas of food processing plants, warehouses, and other plants and the industrial and institutional places, where rat or mouse infestation is a major problem.

All outdoor placements must be made in damp or wet areas. RMK-308 Rodenticide is especially effective in these areas. It is not effective in dry areas and should not be applied there.

RMK-308 Rodenticide is a long acting rodenticide which works in the food chain. It is weather resistant and does not wash away. It is effective against all species of rats and mice. It is also effective against Norway rats, roof rats, house mice, and Norway rats. It is also effective against Norway rats, roof rats, house mice, and Norway rats.
