

Ms. Tammy Westerman
State Chemical Manufacturing Co.
3100 Hamilton Avenue
Cleveland, OH 44114

APR 29 1987

Dear Ms. Westerman:

SUBJECT: Amendment - Delete golf course and sod farm use
State Brand Formula 324 DZ-125
EPA Reg. No. 1685-89
Your submission dated October 1, 1986

On October 1, 1986, EPA published in the Federal Register a Notice of Intent to Cancel the registration of pesticide products containing diazinon registered for use on golf courses and sod farms (51 FR 35034). The Environmental Protection Agency has determined that you have complied with the requirements of that Notice in a timely manner for the subject product by submitting amended labeling deleting the use on golf courses and sod farms, by addition of the label statement "This product must not be used on golf courses or sod farms". Please note that the required statement must appear on the top of the front panel on your finished labels. Also, add "Contains petroleum distillate" under the ingredients statement, under "Diazinon is a registered trademark of Ciba Geigy Corp.", since you are no longer declaring the solvent as an active ingredient. It is understood that you have not made any other revisions to the last accepted labeling for the subject product. A complete label review will be done when diazinon undergoes reregistration.

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable. A stamped copy of the amended label is enclosed for your records. Please submit five (5) copies of the final printed amended label prior to release for shipment.

As indicated in the Notice of Amendment to Notice of Intent to Cancel, any product released for shipment by the registrant after April 30, 1987, must bear the amended labeling. Any product sold or distributed by retailers or other persons after November 30, 1987, must bear the amended labeling.

Sincerely yours,

George T. LaRocca
Product Manager (15)
Insecticide-Rodenticide Branch
Registration Division

ACCEPTED
with COMMENTS
in EPA Letter Dated:

APR 29 1987

Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for
