# METRO PINE-SOL

(For External Use Only)  
Phenol Coefficient 5, A. O. A. C. Method

**ACTIVE INGREDIENTS**  
Steam Distilled Pine Oil,  
Soap

**INERT INGREDIENT**  
Water, not over 10%

Exceeds the minimum requirements of Commercial Standard CS69-38 Promulgated by the National Bureau of Standards, U. S. Department of Commerce.

A Powerful, Pleasant Disinfectant, Germicide and Deodorant. Guaranteed to be 5 times stronger than pure Carbolic Acid when tested against *S. typhosa* (typhoid germ) by the A. O. A. C. Method. Because of its high efficiency, cleansing properties and agreeable odor, Pine-Sol is admirably adapted for use in Homes, Apartments, Hotels, Office Buildings, Schools, Public Institutions, Railway and Bus Stations, and other places where people congregate, as a Disinfectant, Cleanser and Deodorant.

## DIRECTIONS FOR USE

**FLOORS:** When mopping or scrubbing use 4 ounces PINE-SOL to each pail (10 qts.) of water. Apply so as to wet all surfaces to be disinfected.

**DISINFECTING:** Remove all surface dirt and use a solution of one part PINE-SOL to 100 parts of water. Apply thoroughly so as to wet all surfaces.

**TOILET ROOMS, WATER CLOSETS AND URINALS:** Wash the closet and urinal bowls regularly with a solution made of  $\frac{1}{2}$  cupful (4 Ozs.) of PINE-SOL to two gallons of water, leaving the solution in the bowl as long as possible. Scrub the floor and other surfaces, tub and seat frequently with this solution.

**SICK ROOM:** In the sick room, for the disinfection of beds, clothes, utensils, and rooms use PINE-SOL in the scrub water in the proportion of 4 ozs. to a pail (10 qts.) of water. Scrub floors, bed and woodwork thoroughly, so that all surfaces will be wet with the disinfectant solution. Soak linens and clothing of patient in this solution for 10 minutes before washing. Cover stools with the solution until disposed of and wash bedpan thoroughly.

**CUSPIDORS:** A solution of 2 ozs. of PINE-SOL to a gallon of water will aid in deodorizing and disinfecting cuspidors. Leave some of this solution standing in the cuspidor.

**GARBAGE:** To aid in preventing the breeding of flies and certain other vermin, and to deodorize the garbage, sprinkle freely with a solution in the proportion of 4 ounces of PINE-SOL to each gallon of water. Rinse the empty can with some of the solution and leave some in the can.

**ALWAYS PUT PINE-SOL IN PAIL FIRST AND THEN ADD THE WATER.** It mixes readily with water and forms a creamy milk-white emulsion which does not separate on standing.

## CAUTION:

**KEEP OUT OF REACH OF CHILDREN.  
HARMFUL IF SWALLOWED.**

If swallowed, give raw egg white, milk, mucilage, gruel, or cornstarch paste. Call a physician immediately. Do not reuse empty drum. Return to drum conditioner or destroy by perforating or crushing and burying in a safe place.
