| INERT INGREDIENTS: | 96.0% |
| Total | <u>100.0%</u> |

EPA Registration No. 1706-125

NaKil Weed Killer 2413 Granular is a non-selective herbicide for controlling a wide range of annual and perennial weeds and grasses. It is recommended only for non-

dependent upon rainfall, soil type, and other conditions.

DIRECTIONS: NaKil Weed Killer 2413 Granular is a dry granular formulation which can be applied to lawns, gardens, and other areas with equipment which is available from most lawn care services. For the control of annual weeds and grasses, apply NaKil 2413 Granular at the rate of 20-40 pounds per acre on the smaller plots, 0.5-1.0 pounds per 100 square feet. Repeat applications may be necessary. Do not apply to crops. To control the listed weeds, NaKil 2413 Granular should be applied when the weeds are actively growing. The granules should be applied to the soil surface and should give results within a few days. For best results, NaKil 2413 Granular should be applied at any time of the year in areas where weeds are present. In and regions where weeds are present, it is recommended that users should consult state agricultural extension agents and specialists for recommendations on soil moisture and other factors.

IMPORTANT: Do not apply NaKil 2413 Granular to areas where the material may contact children, pets, or other domestic animals. Do not apply to areas where the material may contact livestock or other domestic animals. Do not apply to areas where the material may contact food or feed crops, trees, shrubs, or other plants intended for domestic purposes. Do not apply to areas where the material may contact crops, trees, shrubs, or other plants intended for domestic purposes. Do not apply to areas where the material may contact livestock or other domestic animals.
