DANGER:
CORROSIVE. CAUSES EYE DAMAGE AND SKIN Burns. MAY CAUSE ALLERGIC SKIN REACTION. MAY BE HARMFUL IF INHALED. MAY BE FATAL IF SWALLOWED OR ABSORBED THROUGH THE SKIN.
Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing vapor or mist. Avoid contamination of food. Do not take internally. Wash thoroughly after handling.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish and wildlife. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NEPES permit. For guidance on disposing of pesticide wastes, contact your nearest Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this pesticide only as specified on this label.

STORAGE AND DISPOSAL
STORAGE: Do not contaminate water, food, or feed by storage or disposal. Open containers are prohibited.

DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or container is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative of the nearest EPA Regional Office for guidance.

Metal Containers: Triple rinses (see equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

Plastic Containers: Do not reuse empty container. Triple rinses (see equivalent). Then puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

PAPER MILL SLIMICIDE

ACTIVE INGREDIENTS:
1-Chloro-2-methyl-4-hydroxybenzimidazole-3-one ........................................ 1.05%
2-Methyl-4-hexyloxazolidine-3-one ............................................................ 0.35%

INERT INGREDIENTS: 98.60% Total 100.00%

KEEP OUT OF REACH OF CHILDREN

DANGER

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Do not induce vomiting. Drink promptly a large quantity of egg whites, gelatin solution or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately. Never give anything by mouth to an unconscious person.

IF INHALED: Remove immediately to fresh air. If not breathing, apply artificial respiration. If breathing is difficult, give oxygen and call physician.

IF ON SKIN: Wash thoroughly with soap and water. Remove and wash contaminated clothing before reuse.

IF IN EYES: Flush with plenty of water for at least 15 minutes. Call a physician.

NOTE TO PHYSICIAN: Probable necrosis damage may contraindicate the use of gastric lavage.

SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.

D. O. T.: CORROSIVE LIQUID, N. O. S. UN 1760 (5-CHLORO-2-METHYL-4-ISOTHIOLZAZOLIN-3-ONE)

DIRECTIONS FOR USE:
GENERAL CLASSIFICATION

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PAPER MILL WATERS
NALCO 7617 is recommended for the control of bacterial and fungal slime in the production of paper.

POINT OF ADDITION: NALCO 7617 should be added to a point in the system to insure uniform mixing such as the Becker, Hydropel, or Foam Brake Storage Pumps.

DOSAGE: Apply 0.44 to 1.5 lbs. (2 to 6.8 kg) of NALCO 7617 per ton (4,000 lb) of pulp or paper produced as a sludge deck, if needed repeated daily. Baby foulod systems should be cleaned before initial treatment.

POLYMER LATEX PRESERVATION
NALCO 7617 is recommended for the control of bacteria and fungi in the manufacture and storage of synthetic and natural polymer latices including: acrylic, styrene/butadiene; carboxylated styrene/butadiene; ethylene/vinyl acetate, and biopolymers intended for industrial use such as: xanthan gum, guar gum, yeast gum, protein-derived polymers, starches, and casein-derived polymers.

Add 0.43 to 0.6 lbs. (193 to 270 g) of NALCO 7617 per 1000 lbs. (454 kg) of use to provide 0.25 to 0.350 ppm product (0.25 to 0.350 ppm active isothiazolone).

NOTE: To insure uniform mixing, add NALCO 7617 to latex solutions slowly with agitation. The actual concentrations required will depend upon such factors as the specific substrate to be treated, frequency of use, and the expected microbial contamination expected, and level of treatment required.

COATING PRESERVATION
NALCO 7617 is recommended as an in-container preservative for the control of bacteria and fungi in water-based coatings such as paper coatings.

Add 0.12 to 0.65 lbs. of NALCO 7617 (193 to 270 g) to each 1000 lbs. (454 kg) of fluid to provide 0.25 to 1.675 ppm product (0.25 to 25 ppm active isothiazolone).

DISPERSED PIGMENT PRESERVATION
NALCO 7617 is recommended for the control of bacteria and fungi in the manufacture and storage of dispersed pigments such as: carbon black, silicone rubber, titanium dioxide, calcium carbonate, calcium sulfate, barium sulfate, magnesium silicate, and kieselguhr used in paper manufacturing.

Add 0.43 to 0.6 lbs. of NALCO 7617 (193 to 270 g) to each 1000 lbs. (454 kg) of fluid to provide 0.25 to 1.675 ppm product (0.25 to 25 ppm active isothiazolone).
