 P.O. Box 717
 Theodore, AL 36590

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment:
 - a. Add the phrase "EPA Registration No. 1719-39."
 - b. Add "Contains petroleum distillates" near the ingredient statement.
 - c. The appropriate signal word is "Warning" not "Caution," based on previously registered products. Make all appropriate changes.

ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL DATE
Jusan Lewis MAR 28 1989

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

ONE QUART

PRECAUTIONARY STATEMENTS

CONTAINS PETROLEUM DISTILLATES

HAZARD TO HUMANS AND DOMESTIC ANIMALS. CAUTION! May be harmful or fatal if inhaled or swallowed. Avoid breathing of vapors or spray mist. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.

STATEMENT OF PRACTICAL TREATMENT. In case of contact with skin or eyes, flush with plenty of water. Get medical attention if irritation persists. If inhaled, remove victim to fresh air. Get medical attention. If swallowed, do not induce vomiting. Get medical attention immediately.

ENVIRONMENTAL HAZARD. Do not contaminate water when disposing of equipment washwaters.

PHYSICAL AND CHEMICAL HAZARD. Keep away from heat and open flame.

DIRECTIONS FOR USE.

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This product is not intended for use on food, feed, potable water, living plants, livestock, dairy animals, or on wood surfaces where there will be frequent or prolonged skin contact.

COP-R-TOX 202 FOR PROTECTION OF WOOD

Cop-R-Tox 202 is for use on exterior wood, and on interior wood for aid in penetrating termites and where the wood is subject to frequent or prolonged wetting.

Cop-R-Tox 202 soaks into wood pores giving long lasting protection against termites, decay, mildew and mold. Its lack of water solubility after curing aids its waterproofing qualities.

COP-R-Tox 202 extends the service life of wood for several years. However, the service life is directly proportional to the amount of the product that is applied.

COP-R-TOX 202 FOR MARINE USE

DIP OR SOAK CANVAS, WOOD, ROPES, NETS AND SEINES UNTIL THOROUGHLY WET. Cop-R-Tox 202 saturates the fiber protecting against rot, mildew and mold.

Its waterproofing qualities add to its exceptional value in the preservation of these materials and to its long life and strength.

WOOD BOATS

Cop-R-Tox 202 affords protection against decay-causing fungus and mold in interior and exterior locations. It has particular utility in bilges and on surfaces to be painted. Cop-R-Tox 202, when applied to bare wood which will be below the waterline, will give 30 to 60 days protection in the event that the anti-fouling exterior coat of paint is scraped off by contact with pilings or other surfaces.

DIRECTIONS

Cop-R-Tox 202 is a 20% copper naphthenate emulsion in water and each gallon may be thinned with one gallon of water to produce a 10% copper naphthenate solution. Cop-R-Tox 202 may be applied by brushing freely, spraying or dipping in a tank. For lumber, Cop-R-Tox 202 penetrates best and is most effective when wood is unpainted, dry and clean. Apply Cop-R-Tox 202 generously to all joints, cracks and end grains. If any cuts or holes are made after the initial treatment, Cop-R-Tox 202 should be reapplied to those areas. Cop-R-Tox 202 may be painted over in 24 hours as it contains no creosote or tar products. A green cast may be noted in the first priming coat but this is not bleeding and should not show in subsequent topcoats of enamel. All wood in contact with the earth or secured to concrete slabs should receive two flowing coats by brushing or spraying or be dipped for at least five minutes. Other wood surfaces require only one coat. Cop-R-Tox 202 should be applied at the rate of 300 square feet per gallon.

STORAGE AND DISPOSAL PROHIBITIONS

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE

Do not store near heat or open flame. Store in original container only. Close container after each use. Keep in a locked storage area and out of reach of children.

PESTICIDE DISPOSAL

Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional office for guidance.

CONTAINER DISPOSAL

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.
