 ED U

1729-85  
 Comments

The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor, and increased chlorine demand of the water. The use of TESCO-CIDE Algae Control will help to maintain the water in a clean condition.

TESCO-CIDE Algae Control is compatible with the usual water treatment chemicals. By controlling algae growth with this product, the chlorine demand of the pool may be significantly reduced.

NOTE: Test kits can be obtained from W. A. Taylor Company, 7300 York Road, Baltimore, Maryland, or from LaMotte Chemical Products Company, Chestertown, Maryland.

### DIRECTIONS

- (1) In freshly filled pools or pools showing no visible algae growth, add 8 oz. TESCO-CIDE Concentrated Algae Control per 10,000 gallons of water to prevent algae growth.
- (2) If algae growth is observed, add 16 oz. TESCO-CIDE Algae Control per 10,000 gallons of water to kill and control those algae species most commonly found in swimming pools. When existing growth is dead, clean the pool, drain and refill if necessary, and add 8 oz. TESCO-CIDE Algae Control per 10,000 gallons of water.
- (3) If the pool water treated as in (1) or (2) is recycled, add 8 oz. TESCO-CIDE Algae Control per 10,000 gallons of water every 5 to 7 days to maintain between 2 and 5 p.p.m. of active ingredient.
- (4) If the pool water treated as in (1) or (2) above is not recycled or not filtered, it should be tested periodically to determine the active ingredient content. When necessary, 8 oz. TESCO-CIDE Algae Control per 10,000 gallons of water should be added to maintain 2 to 5 p.p.m. of active ingredient.

**DANGER: KEEP OUT OF REACH OF CHILDREN:** Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution; or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

**ENVIRONMENTAL PRECAUTIONS:** This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water.

**RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD IT.**
