

SWIM GARD®

ALGAE CONTROL

ACTIVE INGREDIENTS:

N-Alkyl (50% C₁₄, 40% C₁₂, 10% C₁₆ Dimethyl
Benzyl Ammonium Chloride 40%

INERT INGREDIENTS 60%

100%

Net Contents
1 Quart (0.95 Liters)

EPA Est. No. 1729-GA-01
EPA Reg. No. 1729-85

HYDROTECH
POOL & SPA CHEMICALS

DANGER: Keep out of reach of children.
See other warnings on back panel.

SWIM GARD®

ALGAE CONTROL

SWIM GARD®

STATEMENT OF PRACTICAL TREATMENT. If swallowed, drink promptly a large quantity of milk, egg whites, or water. Call a physician. In case of skin or eye contact, flush with plenty of water for at least 15 minutes. For eyes, seek medical attention promptly. Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsions may be needed.

PRECAUTIONARY STATEMENTS. HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS. DANGER. CORROSIVE. Causes eye damage and skin irritation. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS. The product is toxic to fish. Do not discharge into lakes, streams, ponds or public water systems in accordance with a NPDES permit. For guidance, contact your regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS. Do not mix with soap or anionic materials. SWIM GARD is compatible with most chemicals commonly used in swimming pool maintenance, however, in its concentrated form the chemical should not come in contact with high concentrations of chlorine. Do not mix SWIM GARD and chlorine together before adding to

the pool water. These chemicals should be handled separately. May be corrosive to iron, brass, aluminum, lead and tin.

DIRECTIONS FOR USE. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor, and increased sanitizer demand of the water. The use of SWIM GARD will help to maintain the water in a clear condition.

In freshly filled pools or pools showing no visible algae growth, add 8 oz. of SWIM GARD per 10,000 gallons of water to prevent algae growth. If algae is observed, add 18 oz. of SWIM GARD per 10,000 gallons of water to kill and control those algae species most commonly found in swimming pools. When existing growth is dead, clean the pool, drain and refill if necessary, and add 8 oz. of SWIM GARD per 10,000 gallons of water.

If the pool water treated as above is recycled, add 8 oz. of SWIM GARD per 10,000 gallons of water every 5 to 7 days to maintain between 2 and 5 ppm of active ingredient. If the treated pool water is not recycled or filtered, it should be tested periodically with a quaternary ammonium compound test kit to determine the active ingredient content. When necessary, 8 oz. of SWIM GARD per 10,000 gallons of water should be added to maintain 2 to 5 ppm active ingredient.

STORAGE AND DISPOSAL. Keep product dry in closed container when not in use. Store in a cool, dry, well ventilated area away from heat, open flames and organic chemicals. Do not reuse empty container. Place empty container in trash collection or dispose in approved landfill area or bury in a safe place.
