REPLACEMENT CANISTER

This Replacement Canister will function as a soaker-type chemical feeder as a satisfactory means of maintaining the available chlorine residual in swimming pools.

FOR INSTALLATION IN E-Z-CLOR CHEMICAL FEEDER—Punch holes at indentation points in the bottom of canister. Next, punch out the lowest possible hole on each side of the canister. If additional chlorine is needed, more holes may be punched in the canister. Starting at lowest point, increase number of punched holes until the correct capacity is reached.

For best results, maintain pH at 7.4 to 7.6, total alkalinity at 90-120 p.p.m., chlorine residual at 1.5 p.p.m., and cyanuric acid level at approximately 50 p.p.m. A satisfactory test kit is important to accomplish these water tests.

DANGER

Do not mix the chemicals in this canister with other chemicals or oxidizing agents. Store in a cool, dry place prior to installation in the feeding device.

KEEP OUT OF REACH OF CHILDREN. Canister causes severe eye damage and skin irritation. Do not get in eyes, on skin, or on clothing. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID. In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN. Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsions may be needed.

DANGER: Oxidizing material. Do not mix the chemicals in this canister with other chemicals or oxidizing agents. Contact with heat, moisture, or foreign materials may result in fire. May burn with the evolution of irritating and hazardous gases. Store in a cool, dry place prior to installation in the feeding device. Keep away from heat or open flames.

ENVIRONMENTAL PRECAUTIONS: This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.

RINSE EMPTY CONTAINER THOROUGHLY WITH WATER AND DISCARD IT.
