TESCO-TABS King Size Tablets

TESCO-TABS King Size Tablets are a highly effective, fast-acting, and long-lasting swimming pool chlorinator. They are designed to provide a continuous supply of chlorine to your pool, keeping it clean and clear throughout the season. The tablets are made from a special blend of chemicals that are safe for your pool and your family. They are easy to use and require no special equipment. Simply add the tablets to your pool and they will do the rest.

DIRECTIONS

1. Before using TESCO-TABS King Size Tablets, check the chlorine level in your pool. If the level is low, add a small amount of chlorine until it is in the proper range. Then add the tablets to your pool. The tablets will slowly dissolve and release chlorine into the water. This will keep your pool clean and clear throughout the season.

2. Add the tablets to your pool in the following amounts:

| | |
|---------------------------|-------------------|
| Pool Size | Amount of Tablets |
| Up to 10,000 gallons | 1 tablet |
| 10,000 to 15,000 gallons | 2 tablets |
| 15,000 to 20,000 gallons | 3 tablets |
| 20,000 to 25,000 gallons | 4 tablets |
| 25,000 to 30,000 gallons | 5 tablets |
| 30,000 to 35,000 gallons | 6 tablets |
| 35,000 to 40,000 gallons | 7 tablets |
| 40,000 to 45,000 gallons | 8 tablets |
| 45,000 to 50,000 gallons | 9 tablets |
| 50,000 to 55,000 gallons | 10 tablets |
| 55,000 to 60,000 gallons | 11 tablets |
| 60,000 to 65,000 gallons | 12 tablets |
| 65,000 to 70,000 gallons | 13 tablets |
| 70,000 to 75,000 gallons | 14 tablets |
| 75,000 to 80,000 gallons | 15 tablets |
| 80,000 to 85,000 gallons | 16 tablets |
| 85,000 to 90,000 gallons | 17 tablets |
| 90,000 to 95,000 gallons | 18 tablets |
| 95,000 to 100,000 gallons | 19 tablets |

3. Check the chlorine level in your pool every week. If the level is low, add a small amount of chlorine until it is in the proper range. Then add the tablets to your pool. The tablets will slowly dissolve and release chlorine into the water. This will keep your pool clean and clear throughout the season.

TESCO-TABS King Size Tablets

When used as directed this product is effective as a pool water disinfecting agent.

The filter system should be backwashed or properly cleaned and the pH adjusted between 7.4 and 7.6. It is recommended that the pool be stabilized with 40-50 p.p.m. trihydroxy triazine to nullify the dissipation effect of sunlight on chlorine. When using this product, both chlorine and trihydroxy triazine are being added to the water. However, it is necessary to initially stabilize pools with 40-50 p.p.m. trihydroxy triazine to effectively maintain the desired concentration of stabilizer.

DIRECTIONS

A chlorine residual of 1.0 to 1.5 p.p.m. available chlorine must first be established in the pH-adjusted and conditioned pool. If this is accomplished with a granular product such as TESCLOR Granular, follow directions for use on that product label. If the residual is established with TESCO-TABS Tablets in a chemical feeder, set the feeder at the highest feed rate in accordance with the feeder manufacturer's instructions. When the residual reaches 1.0 to 1.5 p.p.m., adjust the feeder accordingly.

To maintain a chlorine residual of 1.0 to 1.5 p.p.m., adjust whatever proportioning mechanism that might be used to assure a constant treatment level of 1.0 to 1.5 p.p.m. available chlorine in the pool water (normally 1 to 2 ounces of this product per 10,000 gallons daily). Feeder manufacturers' operating instructions will provide settings for this and other feed rates.

Pool disinfection may be accomplished by putting TESCO-TABS Chlorine Tablets into skimmers. Determine the demand by use of a test kit and use the number of tablets necessary to satisfy this demand.

Check chlorine residual daily using a reliable test kit to determine if further adjustments may be necessary to maintain the recommended level of available chlorine in the pool water.

DANGER: Keep out of reach of children. Corrosive. Causes severe eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution; or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

Oxidizing material. Contact with heat, moisture, or foreign materials may result in fire. Will burn with the evolution of irritating and hazardous gases. Store in a cool, dry place. Keep away from heat or open flames.
