Attention: R. Franklin Handy, Ph.D.
Director, Governmental Affairs

Gentlemen:

Subject: RFH-88-127 Labeling for Mini Tabs
EPA Registration No. 1729-100
King Size Tabs
EPA Registration No. 1729-101
Skimmer Sticks
EPA Registration No. 1729-120 ✓
Your Submissions Dated May 18, 1988

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable provided that the following labeling revision is made before the products are released for shipment bearing the amended labeling.

- Revise the front panel referral statement to read "See practical treatment and other precautions on the back panel."

A stamped copy of the label for each product is enclosed for your records.

59683:I:Douglas:K-8:KENCO:9/13/88:9/26/88:CL:psr:de:VO:CT

-2-

Submit the final printed labeling for inclusion in the product file.

If you have any questions in this regard, contact Ms. Ruth Douglas
at (703) 557-3842.

Sincerely yours,

Jeff Kempter
Product Manager (32)

SKIMMER STICKS

STATEMENT OF PRACTICAL TREATMENT. If swallowed, feed bread soaked in milk, followed by olive oil or cooking oil. Seek medical attention immediately. In case of skin contact, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation develops, seek medical attention. In case of eye contact, flush eyes with cold water for at least 15 minutes. Seek medical attention promptly.

PRECAUTIONARY STATEMENTS. HAZARDS TO HUMANS AND DOMESTIC ANIMALS. DANGER. CORROSIVE. Causes eye and skin damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS. This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public water unless in accordance with an NPDES permit. For guidance, contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS. Strong oxidizing agent. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction, with generation of heat, hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. If necessary, flood with large volumes of water.

DIRECTIONS FOR USE. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

When used as directed this product is effective as a swimming pool water disinfecting agent. The filter system should be in proper working condition, with pH maintained between 7.2 and 7.6, total alkalinity between 100 and 150 ppm, and calcium hardness between 150 and 300 ppm.

Initially stabilize freshly filled pools with 20-30 ppm Sta-Bil to increase chlorine stability and reduce the degradation effect of sunlight. Maintain a Sta-Bil residual of 40-50 ppm.

A chlorine residual of 1.0 to 2.0 ppm free available chlorine must first be established in the pH adjusted and conditioned pool. If this is accomplished with a granular product such as Granular Concentrate, follow directions for use on that

BACK PANEL

SKIMMER STICKS (CON'T)

product label. If the residual is established with **Skimmer Sticks** in a chemical feeder, set the feeder at the highest rate in accordance with the feeder manufacturer's instructions. When the residual reaches 1.0 to 2.0 ppm, adjust the feeder accordingly.

Maintain a constant level of 1.0 to 2.0 ppm free available chlorine in the pool water (normally, 1 to 2 ounces of this product per 10,000 gallons daily). One Skimmer Stick weighs 8 ounces. Feeder manufacturer's operating instructions will provide settings for this and other feed rates.

Pool disinfection may be accomplished by putting **Skimmer Sticks** into skimmers. Determine the demand by use of a test kit and use the number of sticks necessary to satisfy this demand.

Check chlorine residual daily using a reliable test kit to determine if further adjustments may be necessary to maintain the recommended level of available chlorine in the pool water. Do not swim in the water if the chlorine residual is greater than 3.0 ppm.

STORAGE AND DISPOSAL. Keep product dry in tightly closed original container when not in use. Store in a cool, dry, well ventilated area away from heat, open flames, organic chemicals and sunlight. DO NOT REUSE EMPTY CONTAINER. Rinse empty container thoroughly with water and discard in trash.
