HYDROTECH CHEMICAL CORPORATION  
1850 AIRPORT INDUSTRIAL PARK DRIVE  
MARIETTA, GA. 30062

A Subsidiary of Great Lakes Chemical Corporation

ACCEPTED  
with COMMENTS  
to EPA Letter Dated:

NOV 8 1983

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, this pesticide  
registered under EPA Reg. No.  
1729-131

**STATEMENT OF PRACTICAL TREATMENT.** If swallowed, drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Call a physician immediately. In case of skin contact, wash thoroughly with soap and water. In case of eye contact, flush eyes copiously with water for at least 15 minutes. Seek medical attention promptly.

**PRECAUTIONARY STATEMENTS. HAZARDS TO HUMANS AND DOMESTIC ANIMALS. DANGER. CORROSIVE.** Causes irreversible eye damage and skin irritation. Do not get in eyes, on skin, or on clothing. Wear rubber gloves when handling. Avoid breathing dust. Irritating to nose and throat. Remove and wash contaminated clothing before reuse. Harmful if swallowed.

**ENVIRONMENTAL HAZARDS.** This product is toxic to fish. Do not discharge into lakes, streams, ponds or public water unless in accordance with an NPDES permit. For guidance, contact your regional office of EPA.

**PHYSICAL AND CHEMICAL HAZARDS.** Strong oxidizing agent. Mix only with water. Use clean, dry utensils and equipment. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, hazardous gases and possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. If necessary, flood with large volumes of water.

**DIRECTIONS FOR USE.** It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

When used as directed, AQUABROME TABLETS are effective as a swimming pool water sanitizer and disinfectant. The filtration system should be in proper working order, the pH adjusted between 7.2 and 7.8, the total alkalinity maintained at 100 to 150 ppm, and the calcium hardness maintained at 150 to 300 ppm.

A bromine residual of 1.0 to 2.0 ppm must first be established in the pH adjusted pool. If this is accomplished with a granular hypochlorite product such as NOK-OUT<sup>™</sup> or FAST SHOCK<sup>™</sup>, follow use directions on that product's label. If the residual is established with AQUABROME TABLETS in an AQUABROME BROMINATOR, set the brominator at the highest feed rate following manufacturer's instructions. When the bromine residual reaches 1.0 to 2.0 ppm, adjust the feeder accordingly.

To maintain a bromine residual, adjust the brominator feed rate to assure a constant treatment level of 1.0 to 2.0 ppm in residential pools and 2.0 to 4.0 ppm in commercial pools (normally, 30 to 180 grams of this product per 10,000 gallons daily). Each AQUABROME TABLET weighs about 20 grams. Actual use rates will vary depending on organic load and environmental conditions. The regular use of a good test kit will determine if further adjustments are needed. Do not swim in the water if the bromine residual is above 5.0 ppm.

STORAGE AND DISPOSAL. Keep product dry in closed container when not in use. Store in a cool, dry, well ventilated area away from heat, open flames and organic chemicals. Do not reuse empty container. Place empty container in trash collection or dispose in approved landfill area or bury in a safe place.
