

GUARDEX.

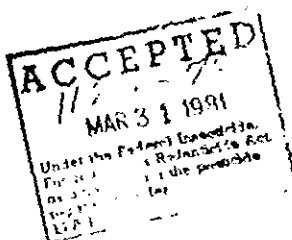

GIANT SIZE CHLORINE TABLETS

Guardex Giant Size Chlorine Tablets contain a concentrated chlorine compound which will provide a stabilized chlorine disinfection and algae control program.

DIRECTIONS FOR USE

1. For the most effective use of this product, your pool should be properly conditioned. To condition your pool, add Guardex Conditioner and Super Chlorinator as directed on the conditioner package. If your pool is already conditioned, simply superchlorinate by adding Guardex Super Chlorinator to the pool, as directed on the label, to obtain a 1.5 ppm chlorine residual. To determine chlorine residual, use a Guardex 4-in-1 Test Kit.
2. Place one Guardex Giant Size Chlorine Tablet in the pool's plastic skimmer basket to provide daily chlorination. Avoid metal objects. Add additional tablets if needed to maintain a chlorine residual of 1.0 to 1.5 ppm as determined by your test kit.
3. Keep pH between 7.4 and 7.6 and total alkalinity between 100 and 120 ppm as determined by an adequate test kit. Check

4W300-79

POOL PRODUCTS FROM A NAME YOU KNOW PUREX

alkalinity after each refilling of your pool. If an alkalinity adjustment is indicated, add 3 pounds of Guardex pH Stabilizer for each 10 ppm increase of alkalinity needed in 20,000 gallons.

WARNING: DO NOT USE IN CALCAREOUS SURFACES, FIBERGLASS

DANGER: DO NOT bring this chemical in contact with other chemicals. DO NOT use any other chemical in this container or put this chemical in another container except Trichloro-s-triazinetriene (TCCA) feeding devices. An explosion or fire may result if this material is brought into contact with other chemicals or contaminants.

Rinse container thoroughly with water before discarding.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

FIRST AID: Internally — food brand soaked in milk followed by olive oil or cooking oil. Call a physician. In case of contact — remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes, get medical attention. Clean contaminated clothing before reuse.
