Mr. William H. Metzger
American Cyanamid Company
Shulton Research Division
697 Route 4G
Clifton, NJ 07015

Dear Mr. Metzger:

Subject: Amendment - Additional Product Chemistry and Final
Printed Labels
COMBAT Roach Control System Formula II
EPA Registration No. 1730-71
Your Application Dated June 7, 1988

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable provided that you make the labeling changes listed below before you release the product for shipment bearing the amended labeling.

1. The signal word "CAUTION" should appear on each individual bait tray label.
2. Based on the current Confidential Statement of Formula (CSF) dated May 21, 1987, your product will not meet the label claim for the active ingredient. Please revise the label or the CSF so the information agrees. Note that the lower limit of the active must be the same as the label claim in pure active form.
3. The product density is given as 1.1 g/cc on the CSF and 1.44 g/cc on the data matrix. Please correct this inconsistency.

4. A 1-year storage stability study conducted at ambient room temperature is required. In addition, specify what type of container is used for storage stability data at ambient room temperature and at elevated temperatures. If product containers are used in this study, please note any degradation of the containers.

Submit five (5) copies of your final printed labeling before you release the product for shipment.

Sincerely yours,

George T. LaRocca

COMBAT[®] Roach Control System

Formula II

COMBAT[®] bait trays contain a totally unique insecticide ingredient to kill roaches. Laboratory and home use tests prove COMBAT gives more long lasting control than the insecticides in leading sprays and foggers. This product is specially designed for large roaches, waterbugs, and palmetto bugs. Make sure to select the right COMBAT Roach Control System for your roach problem by using the pictures below to identify which type of cockroach pest you have. If you have seen both types of cockroach in your home it is strongly suggested you purchase both sizes of COMBAT Roach Control Systems for effective roach control.

Large Cockroach
Habits: Primarily live and breed outdoors and enter homes in search of food. They frequent near door/door points of entry is key.

Small Cockroach
Habits: Primarily live and breed in moist areas like kitchens and bathrooms. More trays are required for effective control.

Here's how COMBAT works.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. For effective roach control, you must use all 8 trays at once:

1. Place all 8 bait trays in areas where you have actually seen roaches. For example near or in floor drains and other exposed plumbing fixtures, near basement windows and doors, and where food is prepared and stored.
2. Use the entire contents of this carton at once. For best results, place next to walls and flush in corners, and at a coverage rate of 2 to 3 per 100 sq. ft.
3. If applying COMBAT to vertical surfaces use enclosed stickers by removing paper backing from both sides. Stickers are not needed on all trays.
4. Roaches will begin eating the bait immediately and you should expect to see fewer roaches within two weeks.
5. Replace all trays every 3 months for effective control of large roaches. Be sure to use the 3 month replacement reminder enclosed.

If you have any questions or comments about COMBAT please call us toll free 1-800-4 COMBAT (Monday through Friday, 9:00 a.m. to 4:00 p.m. Eastern time)

DISPOSAL: Wrap containers and put in trash can.
EFFECTIVENESS GUARANTEE: If COMBAT does not provide roach control, return all 8 bait trays for full refund to Consumer Affairs, American Cyanamid Company, Wayne, New Jersey 07470.
