

N A R R A T I V E

Sunspray 11C is composed of 100% Refined Petroleum distillate and is the same product as Sunspray 11N (EPA REG NO 862-4). The reason Sun Refining and Marketing Company is requesting this new registration is so that we can legally sell a "neat" oil for use in irrigation systems.

For many years Sun Refining and Marketing Company has granted research money to Dr. John Young at the University of Georgia to study the efficacy of using a neat oil such as Sunspray 11N in an irrigation system. The results of Dr. Young's research have been quite promising for a neat oil such as Sunspray 11N.

Earlier this year the EPA came out with PR Notice 87-1 which we attempted to deal with by trying to relabel Sunspray 11N as an end use product for chemigation only. Chemigation is the only instance where Sunspray 11N would be an end use product. In all other cases it is a manufacturing use product and it is the active ingredient in Sunspray 11E (EPA REG NO 862-9). We were not willing to give up the manufacturing use business so it was suggested to us by Mr. Dennis Edwards of the EPA to apply for a new registration for a new product. This new product is Sunspray 11N but under a new name for use in chemigation. This is why this is a ME TOO registration.

Combat Ant & Roach Killer

Front Panel

Kills Ants, Cockroaches, Spiders, and Certain Other Listed Crawling Insects In and Around the Home, Schools, Warehouses, Theatres, Motels, Hotels, and Other Industrial Establishments.

Insect Killing Power Lasts for 1 to 2 Weeks Indoors.

This formulation gives rapid kill of crawling insects listed below, including those resistant to certain chlorinated hydrocarbon and phosphate insecticides. Spray residues kill insects many weeks after the spray deposit has dried.

Spiders
Sowbugs
Earwigs
Crickets

Scorpions
Millipedes
Silverfish
Cockroaches

Saw-toothed Grain Beetle -
(exposed stage)
Brown Dog Ticks
Clover Mites

Ants
Fleas

ACTIVE INGREDIENTS:

- Pyrethrins
- *Piperonyl butoxide, technical
- 1-N-Octyl bicycloheptene dicarboximide
- **2-(1-methylethoxy)phenol methylcarbamate

*INERT INGREDIENTS:

- *Equivalent to 0.08% (butylcarbityl)(6-propylpiperonyl) ether and 0.02% related compounds.
- 1-MGK® 264, Insecticide Synergist
- **BAYGON® - U. S. Patent No. 3,111,539 - Mobay Chemical Corporation.
- *Contains Petroleum Distillate

KEEP OUT OF REACH OF CHILDREN

CAUTION

STATEMENT OF PRACTICAL TREATMENT

- IF SWALLOWED: Call a physician or Poison Control Center. Do not induce vomiting because of aspiration hazard.
- IF IN EYES: Flush with plenty of water. Get medical attention if irritation persists.
- IF ON SKIN OR CLOTHING: Wash skin with soap and warm water. Remove contaminated clothing and wash before reuse.
- IF INHALED: Remove victim to fresh air. Apply artificial respiration if necessary.

Net Weight 11 oz.

Manufactured by:

AMERICAN CYANAMID COMPANY
Clifton, NJ 07015

EPA Reg. No. 1730-

Made in U.S.A.

EPA Est. No. 1730-NJ-1

DECLARATORY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION

May be harmful if swallowed, inhaled, or absorbed through the skin. Contains petroleum distillate. If swallowed, do not induce vomiting because of aspiration hazard. Avoid breathing of spray. Rest and provide adequate ventilation of area being treated. Wash thoroughly with soap and warm water after handling. Avoid contamination of food, utensils and food preparation areas. Remove pets and cover fish aquariums before spraying. If poisoning occurs, get prompt medical attention.

NOTE TO READER: All dollar figures are annual.

Do not use in or on food, drink, preparation, serving or storage areas. In the home, all food preparation surfaces and utensils should be covered during treatment or thoroughly washed before use. Cover exposed food.

FLAMMABLE. Contents under pressure. Keep away from heat, sparks and open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

DIRECTIONS FOR USE

It is a violation of federal law to use this product
in a manner inconsistent with its labeling.

General: In the home and non-food areas of industrial establishments: Spray surfaces to wetting. Point spray away from people, plants and pets. Avoid excessive wetting of plastic, rubber or asphalt surfaces, such as tiles and floor coverings.

FOR SPOT TREATMENT:

Indoor Use: ANTS, COCKROACHES, CRICKETS, SILVERFISH, SPIDERS, SCORPIONS, SAW-TOOTHED GRAIN BEETLES (exposed stage), WATERBUGS: Spray into cracks, crevices around baseboards, and other places where these insects hide. Apply behind and beneath cabinets, refrigerators, sinks, stoves and in and around waste containers. Repeat as needed. Do not spray foodstuffs or house plants. For ants, spray trails and places where ants enter premises. Do not allow children to contact treated surfaces until surfaces are completely dry. /

BROWN DOG TICKS: Spray sleeping quarters of pets, around baseboards, window and door frames, wall cracks, and local areas of floors. Repeat as needed. Fresh bedding should be placed in animal quarters after spraying. Do not spray animals.

FOR CRACK AND CREVICE - Apply as follows:

ANTS, COCKROACHES, CRICKETS, SILVERFISH, SOYBUGS, SPIDERS, FAPWIGS, BROWN DOG TICKS, FLEAS, CARPET BEETLES, AND DERMESTIDS: Apply diluted spray in small amounts directly into cracks and crevices. Equipment capable of delivering a pin stream should be used in points between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases where the above listed insects hide.
