

CATTLE OIL

FORMULA 320

AIDS IN CONTROLLING HORN FLIES, LICE, AND GNATS ON BEEF CATTLE.

INGREDIENT STATEMENT

Active Ingredients — 100%

Mazecton (O,O Dimethyl Dithiophosphate of Diethyl mercaptosuccinate) 2.00%

Mineral Oil 98.00%

Directions for use — Check mechanical equipment before filling to be sure it is operating properly. Reservoir should be clean; faulty or dirty valves and mechanisms should be cleaned or replaced. Pour solution into oil reservoir or apply to burlap or canvas covering until saturated. Replenish the unit with suitable amounts of the solution as necessary. Regular exposure of the animals for about 10 weeks is usually necessary for satisfactory results against lice.

CAUTION

KEEP OUT OF REACH OF CHILDREN

ANTIDOTE:

Internal — Give sodium chloride 15G. (one tablespoonful of table salt) in glass of warm water and repeat until vomit is clear. Call a doctor immediately.

External — Wash with soap and water.

Do not get in eyes, on skin or on clothing. If spilled on skin wash off with soap and water immediately. May be fatal if swallowed.

— Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place.

Bury or discard in a safe place.

Do not use on young calves or dairy animals.

Do not use in automatic oilers which allow an excessive amount of oil on the rubbing surface.

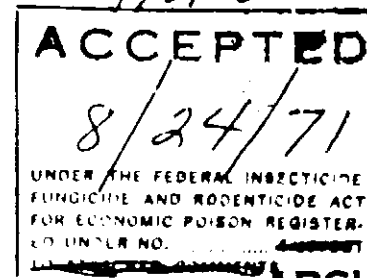

Avoid contamination of feed, foodstuffs, feeders, waterers and food equipment.

Avoid contamination of natural waters, streams, lakes or ponds with this material.

Avoid breathing vapors.

FOR USE IN MECHANICAL OILERS (BACKRUBBERS)

USDA Registration No. 1737-2
