**DIRECTIONS**

NOURSE BEEF CATTLE OIL is ready to use on beef cattle. Do not mix or dilute with oil, kerosene or distillate.

Soak backrubber roll until it is thoroughly wet but not dripping. Repeat as necessary to keep roll wet, usually at two week intervals. If oiler has manually operated valve adjust so that backrubber is kept saturated. Regular use will aid in the reduction of lice and will help reduce weight loss due to hornfly attacks.

CAUTION: Do not treat or allow calves under 3 months of age access to back rubbers.

Avoid using on small calves. Do not use on dairy cattle. Do not permit animals access to treatment within 28 days of slaughter. Avoid storage near feed and food products.

# KNOK-EM-KOLD

## Cattle Backrubber Oil
