DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for Spring start up, superchiorinate with 14 pint (5 ozs.) of Sunny Soi "150" sodium hypochlorite for each 1000 gallons of water. This dosage is equivalent to 5 ppm available chlorine by weight.

For Pool Maintenance.

- A Adjust pool water pH to 7.2 to 7.6 and maintain.
- B Add manually or by a feeder device Sunny Sol "150" sodium hypochlorite at a rate to maintain an available Chlorine residual of 0.6 to 1.0 ppm. One fourth (1.4) pint (5 ozs.) of Sunny Sol "150" sodium hypochlorite for each 5000 gallons of water will provide 1.0 ppm available chlorine by weight. Frequency of additions to maintain 0.6 to 1.0 available chlorine will depend on temperature and number of swimmers. Use test kit to make certain the pH and chlorine residual are in the proper range.

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT

Clean equipment in the normal manner. Just before using rinse all surfaces thoroughly with 200 ppm of Sunny Sol "150". Maintain contact with disinfectant for a minimum of two minutes. Do not rinse with water after Chlorine treatment. Do not soak overnight. Use one part SS 150" to 650 parts of water for a 200 ppm solution.

1. 1. 1.

THIS PRODUCT IS TOXIC TO FISH.

Treated effluent should not be discharged where it will drain into takes, streams, ponds, or public water.

Do not contaminate water by cleaning of equipment, or disposal of wastes.

Apply this product only as specified on this label.

DATE PACKAGED

JONES CHEMICALS, INC.

CALEDONIA, NEW YORK 14423 and Principal Cities
