# DIRECTIONS

Initial Dose: 1 ga on Sunny Sol Algaecide to 50,000 gallons of water

Maintenance Dose: 1 quart Sunny Sol Algaecide to 50,000 gallons of water

Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or re-appear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended dose.

Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If make-up water is added at the rate of more than 10% per week of pool capacity, add 1 quart of Sunny Sol Algaecide for each 10,000 gallons of fresh make-up water added per week.

When swimming season is over and 1 gallon of Sunny Sol Algaecide to 50,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

## LOCKER ROOM DISINFECTION:

Guard against spread of athlete's foot fungi by mopping walkways, poolside and locker room floors with solution of Sunny Sol Algaecide and Disinfectant. Use it also to disinfect pathing suits and Caos.
