

USES

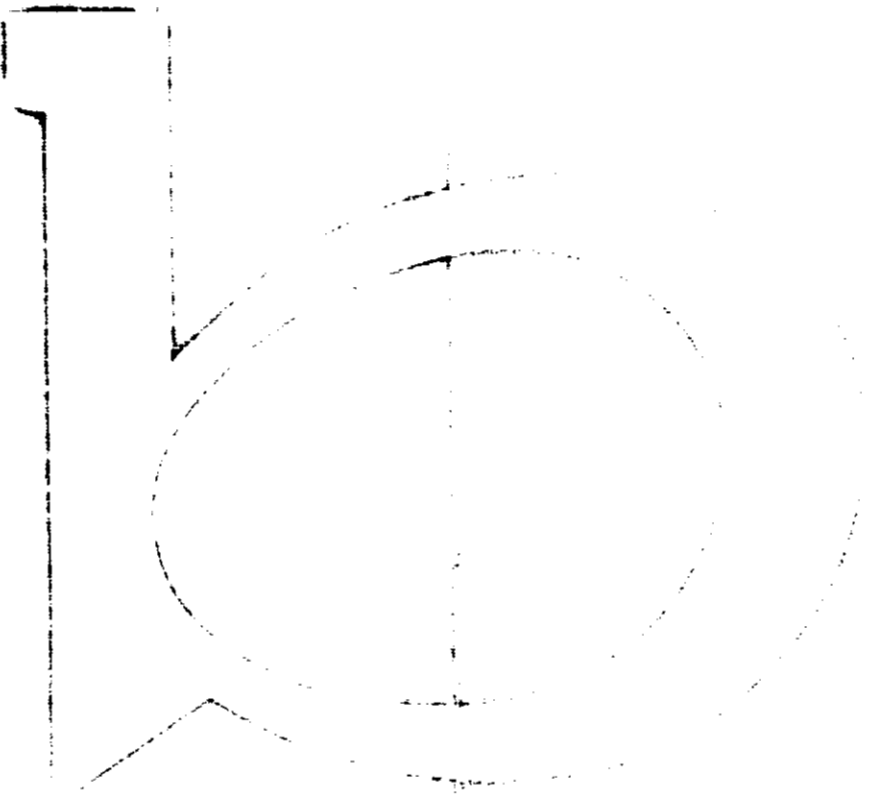

DC-7 is the modern cleaner — Combines 3 operations in one — Cleans — Deodorizes and Sanitizes.

DEODORIZES: DC-7 is an odorless powder in its manufactured form as well as when in dilution — DC-7 renders odorless the cause of the odor — Equally effective in hot or cold, soft or hard water.

SANITIZES: When used 2 ounces to a gallon of water, DC-7 yields 200 ppm of active germicide. When used in general cleaning operations, will reduce bacterial counts to relatively safe levels on treated surfaces.

CLEANER: Has a superior cleansing ability whether used for wall cleaning, floor scrubbing or toilet bowls.

CAUTION: Avoid contamination of foodstuffs. Do not take internally. Concentrate may cause skin irritation or damage to eyes. In case of contact, wash thoroughly with water. If irritation persists, get medical attention.
