BIOSPERSE[®] 230

FOR CONTROL OF THE GROWTH OF ALGAE AND BACTERIA
FOR INDUSTRIAL USE ONLY

BIOSPERSE 230 is a free flowing powder designed to dissolve slowly providing a continuous source of chlorine for controlling the growth of bacteria and algae in industrial recirculating water cooling towers, air washers, and evaporative condensers.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Apply this product only as specified on this label.

This product should be stored in a cool, dry area away from oxidizable materials. Decomposition will occur at temperatures above 220 C. To prevent contamination and loss of potency poly drum liner should be retied and the lid securely replaced when not in use.

ACTIVE INGREDIENT

Trichloro-s-triazinetrione 20.0%

INERT INGREDIENTS* 80.0%

* Includes stabilizing and anti-caking agents.

Available Chlorine Content: 17.8% minimum.
