

[1769-53

NATIONAL PYRA-FOG 100 is a contact insecticide incorporating pyrethrum and synergist in a highly refined mineral oil base. NATIONAL PYRA-FOG 100 is formulated to control roaches, silverfish, weevils infesting stored food products, bed bugs, flies, and certain other insects in their accessible stages. For best results, NATIONAL PYRA-FOG 100 should be used with electric sprayers, but hand or compressed air sprayers may be used.

DIRECTIONS

As an industrial, municipal, or institutional control: For exposed or accessible stages of WEEVILS INFESTING STORED FOOD PRODUCTS, CLEAN areas to be sprayed, especially cracks, crevices, and around machinery. Good housekeeping makes for more effective insect control and a definite savings in the amount of NATIONAL PYRA-FOG 100 required. To spray food storage areas, remove food products from shelves, racks, or storage areas. Spray these areas thoroughly with NATIONAL PYRA-FOG 100 and replace food products. For packaged food, spray in such a manner that a light mist will fall upon the packages. For food products in sacks, spray thoroughly between and around sacks, paying particular attention to all cracks, crevices, walls and any other places that might offer shelter to the weevils. Contact as many weevils as possible. After all the local areas of storage have been sprayed, close all windows and doors. Thoroughly fog the entire storage area, being extremely careful that all food products are covered. Do not allow the spray to contact open food products. After ten to twenty minutes sweep and destroy all fallen insects. Repeat sprayings at least once a week or when reinfestation becomes evident.

Do not treat bulk grain products.

CHEMSEARCH

A-FOG 100 T SPRAY

ACTIVE INGREDIENTS: 100%

Refined Mineral Oil
Technical Piperonyl Butoxide*
N-octyl bicycloheptenedicarboximide
Pyrethrins

* Consists of 0.190 (butylcarbityl) (6 propyl piperonyl) ether and 0.048 related compounds.

CAUTION:

KEEP OUT OF REACH OF
CHILDREN

(See Right Side Panel for additional cautions.)
