

A new type weed killer! Fast Acting! Effective on all types of weed. WK-70 has a residual power to prevent regrowth. Perennial and Deep Rooted Weeds are Destroyed.

**DIRECTIONS: —**

**TO DESTROY ANNUAL WEEDS:** Add 1 gallon to 9 gallons of water and apply as a contact spray. Make certain all parts of the plant are thoroughly wet. When plants are young and tender, use 1 gallon above solution to approximately 200 sq. ft.

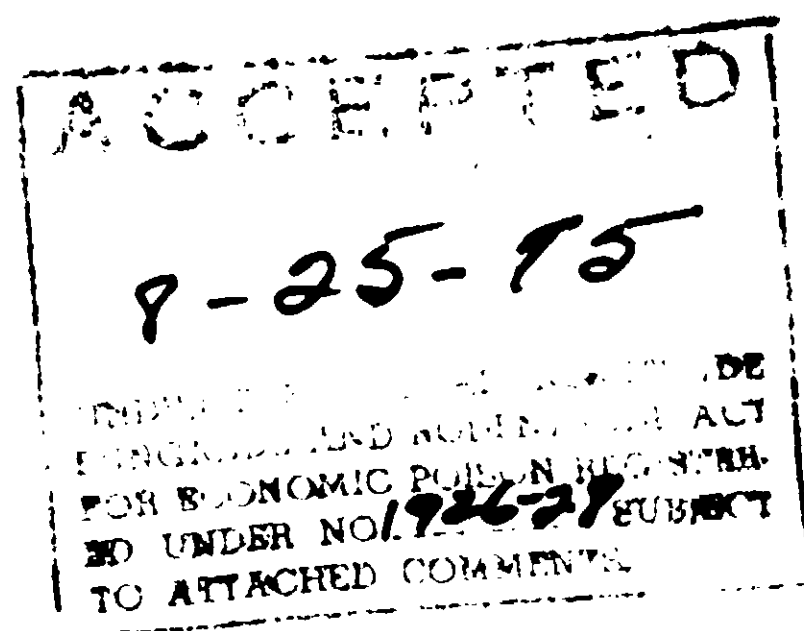

**TO DESTROY PERENNIAL WEEDS:** Perennial weeds are best treated when they near their dormant or maturity stages. Although spring applications may be made, best results are obtained in the fall months. Application is made by spraying 1 to 2 gallons per 100 square feet on average vegetation. However, on deep-rooted perennial weeds and grasses such as Bermuda Grass, Bindweed, Quack Grass, Para Grass, White Top (Hoary Cress), Johnson Grass, Canada Thistle, Leafy Spurge, and other hard-to-kill perennials use 2 gallons per 100 sq. ft. For those hard-to-kill perennials, adequate control may require retreatment.

Residual effects will depend upon rates of application, type of soil, and amount of precipitation after application.

**IMPORTANT:** This is non-selective in action and effects all types of vegetation. Confine the application to the particular area intended for treatment. Avoid contact with Lawns, Trees, Shrubs, Crops and other Plants not intended to be destroyed or injured. This includes treating areas which may be underlaid by roots of adjacent valuable growths. Careless application or washing by water run-off to areas where desirable plants are growing or which will be used for planting may result in injury to desirable plants. Equipment should be thoroughly cleaned after use. Because of varying conditions affecting use and application, soil composition, seasonal weather, location and types of vegetation, complete weed elimination is not guaranteed — nor does manufacturer accept responsibility for use or misuse.

 MANUFACTURING CO.

This is a concentrated, Non-Flammable, Non-Selective Weed and Brush Killer that kills by two fold action: 1—Contact or leaf action, 2—Root action. Permanent destruction of deep rooted and perennial weeds require root action. It is easy to apply and gives fast acting and long-lasting results.

**KILLS—DESTROYS** practically ALL Weeds, Brushes, and Trees. Highly effective against White Top (Hoary Grass), Leafy Spurge, Bermuda Grass, Russian Knapweed, Poverty Weed, Nut Grass, Johnson Grass, Canada Thistle, Horse Nettle, Puncture Vine, Poison Ivy, Bindweed (Morning Glory), Para Grass, Quack Grass, Willows and many other undesirable annual and perennial weeds and grasses.

So effective and economical, it is widely used by Railroads, Highway Commissions, Petroleum Companies, Lumber Companies, Industrial Concerns and Cemeteries. Very effective along drainage ditch banks, banks, fence rows, streets roadways, as well as highways. Also around buildings, storage yards, power lines, parking lots, refineries, pole houses, warehouses, guard rails, bridge abutments, rail sidings and wherever a weed free surface is desired. Use wherever weeds and brush create a fire hazard, a maintenance problem, a nuisance, or an unsightly appearance.

**CAUTION:**  
**KEEP OUT OF REACH OF CHILDREN**  
 Avoid contamination of feed and foodstuffs  
 Do not take internally. If accidental ingestion occurs, call physician.  
 If splashed in eyes, flush with copious amounts of water.  
 Do not contaminate water used for irrigation or domestic purposes.  
 Do not contaminate water by cleaning of equipment or disposal of wastes.  
 Apply this product only as specified on this label

Follow directions carefully. Timing and method of application, weather and crop conditions, mixtures with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
