

GRASSHOPPERS
Locusts, Eastern Lubber, and
the various species of grasshoppers
can be controlled by treatment with
the insecticide recommended. Please
refer to the section on "Grasshoppers".

Chinch Bug - If your lawn has suffered from
this pest, the following treatment will
be effective. Water the lawn to a
depth of one-half to one inch. Apply 1/2
pint of **Vertithion** per 1,000 square feet of lawn area. Apply at
any time between 8:00 A.M. and 4:00 P.M.

**White Grubs, Japanese Beetles, White
Fringed Beetle, and Wire Worms** - All
of these pests can be controlled by
treatment with the insecticide recom-
mended. Please refer to the section
on "White Grubs".

**Ants, Cockroaches, Fleas, Ticks, and
Other Household Pests** - These pests
can be controlled by treatment with
the insecticide recommended. Please
refer to the section on "Household Pests".

Adult Insects - Adult insects can be
controlled by treatment with the insecticide
recommended. Please refer to the section
on "Adult Insects".

Vertithion - Vertithion is a new, highly
selective insecticide which controls
most of the common lawn and turf
pests without harming the grass or
other plants. Avoid contact with skin
and eyes.
