

NATIONAL CHEMSEARCH  
CHEMWEED S-678

SELECTIVE WEED KILLER  
KILLS BROADLEAF WEEDS

ACTIVE INGREDIENTS:

\*Potassium Salt of 2-(2-methyl-4-chlorophenoxy) propionic acid 18.4%

INERT INGREDIENTS:

81.6%

\*Equivalent to 1½ pounds 2-(2-methyl-4-chlorophenoxy) propionic acid per gallon.

CAUTION: (18 pt. tp.) KEEP OUT OF REACH OF CHILDREN (12 pt. tp.)  
(See left panel for additional cautions)

NATIONAL CHEMSEARCH CORPORATION  
2730 Carl Road  
Irving, Texas

LEFT PANEL

DIRECTIONS: - For established turf on lawns, golf greens and fairways, apply 3 fluid ounces of National Chemsearch Chemweed S-678 mixed with 2 gallons of water per 1000 square feet, or 1 gallon mixed with 30-40 gallons of water per acre. For spot treatment, mix at the above proportions and use sprinkling can or pressure sprayer. For larger areas, a boom sprayer is recommended. Apply when weeds are young and actively growing. For maximum results, the area should not be cut for 2-3 days before or after spraying. Do not sprinkle or water for 24 hours after application. Full visible effects requires about three weeks.

CAUTION: Avoid contact with skin, eyes or clothing. Harmful if swallowed. After using, wash hands and other parts of the body that are contaminated with the concentrate, spray or washings. Store in tightly closed containers. Do not store near green houses, seed plants, seeds, fertilizers, insecticides, fungicides or water supplies. Keep from freezing. Do not spray flower beds, borders or shrubbery. Bentgrass, St. Augustine grass, Dichondra and carpetgrass may be injured by applications of Chemweed S-678. Avoid spray drift to susceptible plants as this product may injure cotton, beans, peas, grapes, ornamentals, flowering plants and shrubs. (Coarse sprays are less likely to drift.) Do not use on newly seeded lawns. Do not use first mowing as a mulch. After use, rinse equipment, including nozzles, with water to which has been added a wetting agent or detergent. Pools, streams and water sources must not be contaminated with the concentrate or spray washings.

FISH AND WILDLIFE CAUTION: Fish in waters treated with this product may be harmed. Do not apply to water drainage areas where runoff or flooding will contaminate ponds, lakes, or streams.

RIGHT PANEL

Chemweed S-678 is especially formulated to control:  
Clover Mouse Ear Chickweed  
Chickweed Knot Weed  
Plaintain Ground Ivy  
Certain other broadleaf weeds

Do not reuse empty container. Wash thoroughly with water and detergent. Discard in a safe place.
