TURF-SECT

ORNAMENTAL TURF

National Chemsearch Turf-Sect is specifically formulated to control resistant Japanese beetles, white grubs, white-fringed beetle, wire worms and other insects that are detrimental to greens and fairways.

ACTIVE INGREDIENTS:

| | |
|-------------------------------------|-------|
| Petroleum distillates | 85.8% |
| Ethion, 0,0,0',0',-tetraethyl S,S'- | |
| Methylene bisphosphorodithioate | 6.5% |
| Heptachlor* | 1.6% |

INERT INGREDIENTS:

6.1%

*Equivalent to 1.15% Heptachlorotetrahydro- Δ ,7-methanoindene and 0.45% related compounds.

CAUTION: (18 pt tp) KEEP OUT OF REACH OF CHILDREN (12 pt tp)
(See Side Panels for Additional Cautions)

SIDE PANELS

DIRECTIONS: Chinch bug, Japanese beetle, white grubs, white-fringed beetle, wire worms, sod web worms - Mix one gallon of Turf-Sect in 35 gallons of water to cover 2,000 ft. Spray mist penetrates through mat of turf to control these insects.

CAUTION: Harmful if swallowed. Contact with skin can cause toxic symptoms. Avoid breathing the spray mist. In case of contact with skin, wash with soap and water. Avoid contamination of feed and food stuffs.

Keep children and animals off treated areas until material has been thoroughly watered into soil and grass has completely dried. Birds feeding on treated areas may be harmed.
