## SANA-PHENE

FOR USE AS A DISINFECTANT

For most economical results SANA-PHENE should be diluted with water. It is readily soluble even in hard water.

To disinfect food plant floors and walls, interiors of hospital buildings, kitchen tables, drainboards, glass, soda fountains, refrigerators, cooling rooms, lavatories and garbage cans rinse thoroughly with a solution of 2½ ounces of SANA—PHENE to each gallon of water. Rinse all food contact surfaces with potable water before reuse. Not effective against Ps. aeruginosa.

To disinfect floors, cellars, toilet rooms, urinals, and sinks, clean thoroughly: use 2½ ounces of SANA-PHENE to every gallon of water; mop in regular manner: If it is impractical to mop specific places, use 4 ounces per gallon of water and spray thoroughly over entire surface.

For more drastic conditions, therough cleaning must be done by use of strong cleaning solutions, removing all dirt, then making sure disinfectant comes in contact with all contaminated areas; disinfect with a solution of 5 ounces of disinfectant per gallon of water.

#### **CAUTION:**

Harmful if Swallowed

Avoid contact with skin and eyes, in case of contact flush with water. Do not contaminate or store near feed or foodstuffs.

## SANA-PHENE

GENERAL DIRECTIONS

GENERAL CLEANING AND DISINFECT-ING: Cleanse premises and use a solution of 1.5 ounces of SANA-PHENE to each gallon of water. (Place SANA-PHENE in pail before adding water.) This mixture acts as a disinfectant against S. typhosa. It is highly toxic to many gram-negative bacteria. Not effective against Ps. aeruginosa.

SANA—PHENE has a pleasing aroma and is recommended for public places where discriminating people congregate.

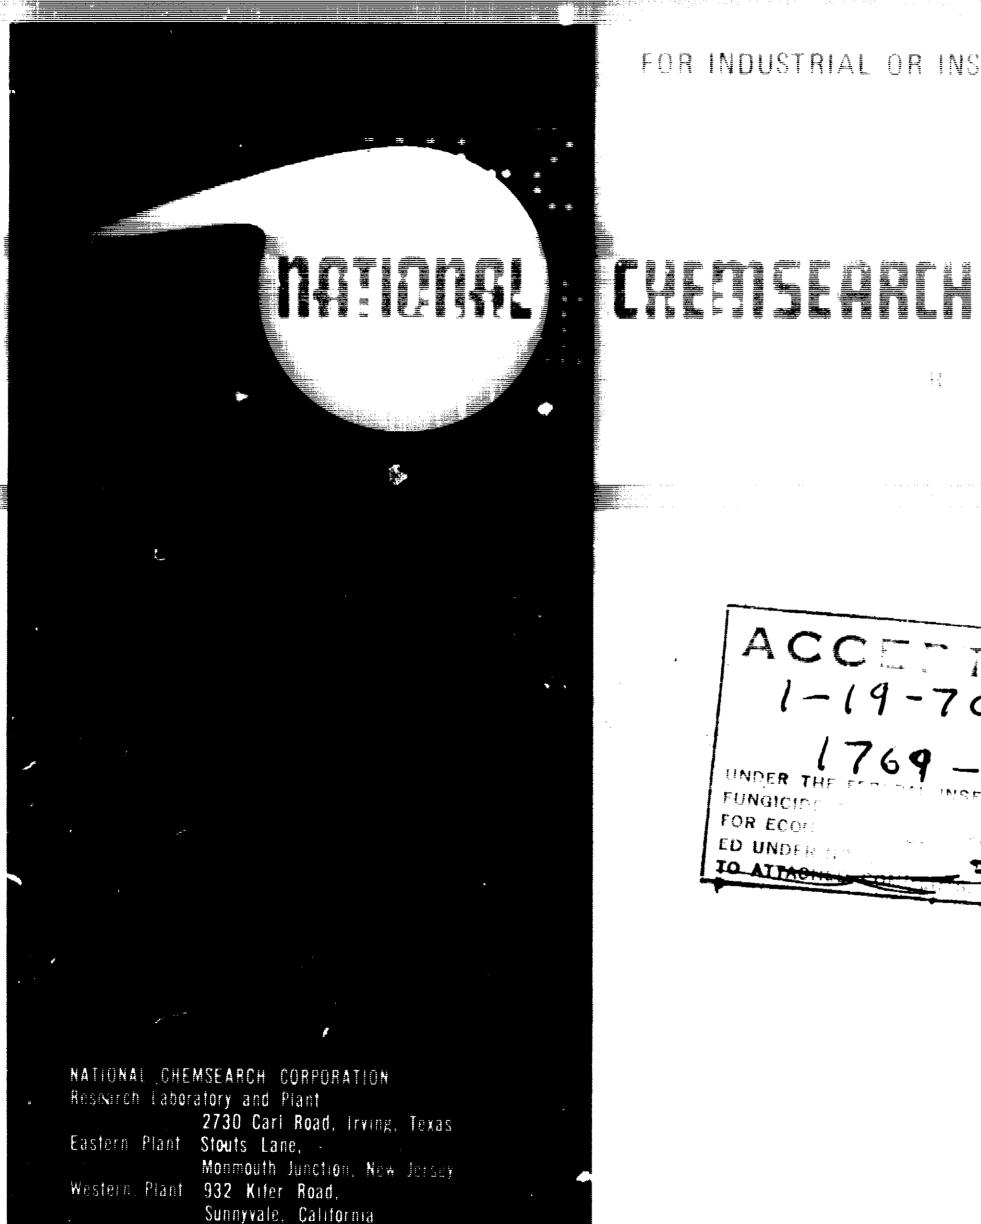

When SANA-PHENE is diluted 1.5 ounces to one gallon of water it may be used as a fungicidal agent, to scrub swimming pool surfaces commonly contacted by the bare feet, thereby aiding in preventing the transmission of athlete's foot fungi by way of environmental surfaces.

#### NOTICE

Keep From Freezing. If this product is stored in cold or freezing weather it may separate or thicken. This will not harm the performance. Before using, warm to room temperature and stir thoroughly.
