SKYCHODA

For Use in Reducing Filter Fly Larvae Populations in Trickling Filters

FOR USE BY TRAINED PERSONNEL ONLY

ACTIVE INGREDIENTS:

Naled: 1,2-d bromo-2,2-dichloroethyl dimethyl phosphate 35.00%

* **INERT INGREDIENTS:** 65.00%

TOTAL 100.00%

This product contains 3.34 lbs of Naled

* Contains Aromatic Petroleum distillates

DANGER

KEEP OUT OF REACH OF CHILDREN

EPA Reg. No. 1769-203

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

WHEN TO APPLY: Trickle filter fly larvae are beneficial to normal filter operation and should be controlled only when the filter's efficiency is in danger of becoming impaired by unusually large numbers of larvae. This condition is usually noted by a very high density of filter fly larvae below a 6 inch depth with a maximum density at about 18 inches where rocks will appear completely covered with larvae and the filter's interstices will have begun to clog with larvae. Overloading is often the cause of increases in these insect populations and should be prevented whenever possible. Back flooding of the filter(s) is another method of reducing the fly larvae and should be considered as an alternative whenever possible.

DOSAGE: One gallon of SKYCHODA per 500 gallons of sewage (800 ppm of active ingredient) must be added in one minute to the top of the trickling filter.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams and ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not use prior to periods of heavy rainfall.

CHEMICAL HAZARDS: Flammable mixture. Keep away from heat or open flame.

STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal. Open dumping and burning is prohibited.

Pesticide Disposal: Pesticide, spray mixture or rinse water that cannot be used according to label instructions must be disposed of according to Federal or approved state procedures under Subtitle C of the Resource Conservation and Recovery Act.

Container Disposal: Triple Rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by other approved state and local procedures.
