Depresses Algae Growth

- Less water treatment - saves money
- Controls algae growth
- In swimming pools, prevents slippery pool floors - can't harm pool finish

D-ALGAE is a product specifically formulated to economically depress algae growth that causes objectionable colors in swimming pools. D-ALGAE is an effective algicide. Due to its non-volatile nature, it is not lost by evaporation.

DIRECTIONS FOR USE

IN SWIMMING POOLS: For outdoor swimming pools, add 1/2 gallon to each 10,000 gallons of water when algae are first visible, and 1 gallon to each 10,000 gallons of water when algae have settled to the bottom, clean out the pool with water and add 1 gallon of D-ALGAE to each 25,000 gallons of water to prevent future growth. Add an additional quantity of 1,000 gallons of water every 5 to 7 days.

When the pool is not for bathing for 1 day, use this product every 5 days or as needed. Always add a minimum of 2,000 gallons of water after every treatment.

IMPORTANT: Do not use in hot tubs, hot springs, or in any other body of water where the water is not intended for swimming.

NOT FOR USE IN HOUSEHOLD
WHOLESALE

WARNING: Harmful or fatal if swallowed. The concentration of D-ALGAE causes eye damage and skin irritation. Do not get in eyes or on skin. In case of contact, flush with plenty of water; for eyes, get medical attention. Avoid contamination of food and feedstuffs.

CAUTION: This product is toxic to fish. Do not discharge treated effluent into lakes, streams or ponds.

NOTICE: KEEP FROM FREEZING If this product is stored in cold or freezing weather it may separate or thicken. This will not harm the performance. Before using, warm to room temperature and stir thoroughly.
