Attention: C. Richard Stolley
Technical Service Chemist

Gentlemen:

Subject: National Chemsearch Everbrite
Germicidal Cleaner
EPA Registration No. 1769-236
Your Application Dated August 7, 1984

The amendment referred to above, submitted in connection with registration under FIFRA, is acceptable provided that you:

1. Make the labeling changes listed below before you release the product for shipment bearing the amended labeling:

a. Note that the second carbon in the first active ingredient should read:

30% C₁₆ not 30% C₁₈

b. Include the full nomenclature for Influenza virus to read:

Influenza A₂

c. Revise the statement:

Harmful or fatal if swallowed
to read
Harmful if swallowed.

Ref.: last accepted label dated September 29, 1978.

d. Include the following statements to the disinfection section:

Treated surfaces must remain wet for 10 minutes. Fresh solution should be prepared daily or when use solution becomes visibly dirty.

CONCURRENCES

SYMBOL ▶								
SURNAME ▶								
DATE ▶								

e. Include the following statements to the sanitization section:

Treated surfaces must remain wet for 1 minute. Fresh solution should be prepared daily or when use solution becomes visibly dirty. For mechanical application, use solution may not be reused for sanitizing applications.

f. Clearly indicate that hospital disinfection dilution is 4 ounces per gallon of water.

g. Phenol coefficient claims are permitted only on labels of those products when the value claimed can be considered meaningful and not misleading. Only when the phenol coefficient of a product, as claimed on the label, can be multiplied by the factor "20" to provide the effective use dilution of the product (as confirmed by the AOAC Use Dilution Method) will the phenol coefficient claim be permitted on the label.

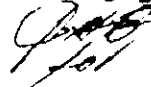

h. The section of the Statement of Practical Treatment which deals with the induction of vomiting should be reevaluated due to the corrosive nature of this product. The Agency feels that a greater danger exists with emesis than with the danger of retention. Therefore a determination must be made by your medical staff regarding these two dangers and the label revised accordingly.

2. Submit five (5) copies of your final printed labeling before you release the product for shipment.

Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

John H. Lee
Product Manager (31)
Disinfectants Branch
Registration Division (TS-767C)

CENTER PANEL

- * FREE RINSING
- * PREVENTS LIME DEPOSITS
- * DEODORIZES AND DISINFECTS

Disinfects Influenza A , Herpes simplex viruses carried on inanimate environmental surfaces.

Effective against a wide spectrum of both gram-positive and gram-negative bacteria including Pseudomonas aeruginosa. Also effective in inactivating Influenza A , (Hong Kong Flu) virus and Herpes simplex virus on inanimate environmental surfaces.

National Chemsearch EVERBRITE Germicidal Cleaner is recommended for the cleaning, sanitizing, deodorizing and disinfecting of floors, walls, sink tops, telephones, tables, chairs, bedframes, fixtures and other environmental surfaces in hospitals, food processing plants, meat packing plants, dairy plants, schools, municipal buildings, hotels and motels.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER**

Harmful or fatal if swallowed. Do not get in eyes, or skin, or on clothing. Corrosive. Causes eye and skin damage. Wear goggles or face shield and rubber gloves when handling.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, as well as oxygen and measures to support breathing manually or mechanically may be needed. If persistent, convulsions may be controlled by the cautious intravenous injection of a short-acting barbiturate drug.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Call a physician or Poison Control Center immediately. If possible, vomiting should be induced under medical supervision. Drink one or two glasses of water and induce vomiting by touching the back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

IF INHALED: Remove victim to fresh air. Apply artificial respiration if indicated.

IF ON SKIN: Remove contaminated clothing and wash affected areas with soap and water.

IF IN EYES: Flush eyes with plenty of water. Call a physician immediately.

RIGHT PANEL

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: KEEP CONTAINER CLOSED.

PESTICIDE DISPOSAL: Waste resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

NOT FOR RESALE

DIRECTIONS FOR USE

GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DISINFECTION: EVERBRITE Germicidal Cleaner is an effective disinfectant and deodorizer when diluted 2 ounces per gallon of water. In use dilution, it reduces the hazard of Staphylococcus aureus as well as certain other pathogenic microorganisms on environmental surfaces. EVERBRITE Germicidal Cleaner has a phenol coefficient of 13.0 against Staphylococcus aureus and 10.0 against Salmonella typhosa, a 4 ounce per gallon dilution of EVERBRITE Germicidal Cleaner must be used. Remove gross filth and heavy soil deposits from surfaces prior to application of the recommended solution. For cleaning and disinfecting resilient floor surfaces or on sealed wood floors, dilute EVERBRITE Germicidal Cleaner 2 ounces per gallon of water if the floor is extremely dirty. Apply with a clean mop or spray so as to thoroughly wet floor. After the cleaner has loosened the dirt and soil, pick up the remainder with a mop, squeegee or wet pickup vacuum. If desired, the floor may be rinsed with clear water.

MOLD AND MILDEWSTAT: EVERBRITE Germicidal Cleaner is an effective fungistat and will control mildew and mold on floors, walls and ceilings. Clean these surfaces prior to application with a compatible detergent using a scrub brush if necessary. Mix 4 ounces to each gallon of water and apply to the surfaces to thoroughly moisten all areas. May be sprayed or mop applied. Repeat application in 7 days to maintain control.

SANITIZATION: EVERBRITE Germicidal Cleaner can also be used in sanitizing previously cleaned food contact surfaces on food processing, meat packing and dairy equipment. When used for this purpose, limit the level of active quaternaries to 200 ppm by diluting 4 ounces of EVERBRITE Germicidal Cleaner to 5 gallons of water. At this level a potable water rinse is required. To sanitize, clean and rinse the equipment thoroughly, then apply the diluted solution of EVERBRITE Germicidal Cleaner by flooding the surface mopping or wiping on.
