AIDS IN REDUCTION OF AIRBORNE BACTERIA AND VIRUS PARTICLES.

For use in public buildings, schools, motels, hotels, industrial plants, hospitals, apartments, bus stations, railway stations, country clubs, health clubs, YMCA's and YWCA's, stores, service stations, and indoor recreation areas.

Spray LEMALENE so that light fog forms. LEMALENE will help sanitize and deodorize the air by temporarily reducing the number of bacteria and virus particles. Repeated applications should be made periodically according to the malodorous conditions that prevail in the air.

ACCEPTED

MAY 1 1975

UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND MITICIDE ACT
FOR ECONOMIC PEST CONTROL REGISTRATION
ED UNDER NO. 1769-257

FOR INDUSTRIAL OR
INSTITUTIONAL USE ONLY

DIRECTIONS:

AS AN AIR SPRAY: For deodorizing, spray LEMALENE upwards into the atmosphere, using a good sprayer that will produce aerosol size particles. To deodorize surfaces for control of foul or dank odors, spray directly on the surfaces to be treated after they have been cleaned. Dampen a cloth with this liquid and use for wiping bathroom fixtures, telephones, and door knobs for excellent deodorizing results.

CAUTION: Avoid contamination of food. Harmful if swallowed. Avoid breathing spray mist. Do not Fog rooms occupied by humans or pets. In liquid form LEMALENE is a combustible mixture. Keep containers away from heat or open flame. Keep containers closed when not in use. Do not reuse empty drum. Rinse thoroughly with water before discarding or returning to drum reconditioner.

NOTICE: KEEP FROM FREEZING. If this product is stored in cold or freezing weather it may separate or thicken. This will not harm the performance. Before using, warm to room temperature and stir thoroughly.
