### CENTER PANEL

For industrial and institutional use around downs, window frames and baseboards for spot treatment in and around schools, hospitals, municipal buildings, industrial plants and offices, apartment buildings, kennels and rest homes.

### DIRECTIONS FOR USE:

It is a violation Federal Law to use this product inconsistent with its labeling.

NOT FOR RESALE

REENTRY

HANDLE THIS PRODUCT ONLY WHEN WEARING THE FOLLOWING PROTECTIVE CLOTHING AND EQUIPMENT DURING MIXING/LOADING, APPLICATION, REPAIR AND CLEANING OF MIXING, LOADING, AND APPLICATION EQUIPMENT, DISPOSAL OF THE PESTICIDE: protective suit of one or two pieces covering all parts of the body except head, hands, and feet; chemical resistant gloves; chemical resistant shoes (or chemical resistant shoe coverings or chemical resistant boots), NIOSH or MSHA approved respirator. Mixer/loaders must also wear a chemical-resistant apron. If overhead exposure is likely wear a hood or wide-brimmed hat. Human flaggers must be in totally enclosed vehicles.

**IMPORTANT:** If pesticide comes in contact with skin, wash off with soap and water and contact a physician immediately. Always wash hands, face, and arms with soap and water before smoking, eating, drinking or toileting.

AFTER WORK: Before removing gloves, wash them with soap and water. Take off all work clothes and shoes. Shower using soap and water. Wear only clean clothes when leaving job—do not wear contaminated clothing. Sontaminated clothing worn during work must be laundered separately from household clothing. Store protective clothing separately from personal clothing. Clean or launder protective clothing after each use. Clothing and protective equipment heavily contaminated or drenched with dichlorvos must be destroyed according to state and local regulations. Heavily contaminated or drenched clothing cannot be adequately decontaminated.

Reentry into treated areas is prohibited for 48 hours after the end of treatment, unless the following protective clothing and equipment is worn: protective suit of one or two pieces covering all parts of the body except head, hands, and feet, chemical resistant gloves; chemical resistant shoes (or chemical resistant shoe coverings or chemical resistant boots, NIOSH or MSHA approved respirator. If sprays have dried, the respirator need not be worn. The treated area must be posted with warning signs beginning at least immediately before application until the reentry interval has expired.

INDOOR APPLICATION: For Ants, cockroaches, crickets, cpiders, silverfish and earwigs— Spray into cracks, crevices, a ound baseboards, and other places where these insects hide. Apply behind and beneath cabinets, refrigerators, sinks, stoves and in and around waste containers. For ants, spray trails and places where ants enter premises. Do not treat foodstuff or house plants.

Do not allow children to contact treated areas until the surfaces are completely dry.

BEST AVAILABLE COPY

Brown Dog Ticks: Spray sleeping quarters of pets around baseboards, window and door frames, wall cracks and local area of floor. Repeat as necessary. Fresh bedding should be placed in animal quarters after spraying. DO NOT TREAT ANIMALS.

APPLICATIONS WITHIN FOOD AREAS OF FOOD HANDLING

ESTABLISHMENTS-Flaces other than private residences in which exposed food is held, processed, prepared or served. FOOD AREAS-APPLICATION LIMITED TO CRACK AND CREVICE TREATMENT ONLY. Includes areas for receiving, storage, packing (canning, bottling, wrapping, boxing) preparing, edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups). Serving areas (when food is exposed and facility is in operation) also would be considered a food area. Apply a small amount of CF-750 by spraying food area. Apply a small amount of CF-750 by spraying using an injection tube or insertion tube directly into cracks and crevices such as expansion joints between different elements of construction or between equipment bases and the different elements of construction or equipment bases and the floor, wall voids, motor housings, junction boxes or switch boxes, conduits or hollow equipment legs where ants, cockroaches, spiders and silverfish hide.

Prior to application, de energize electrical equipment. After application, allow time for oil to evaporate before starting motors or placing switches in the "ON" position. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT, ARE PROHIBITED.

OUTDOOR APPLICATION: Ants, crickets, earwigs, flies and mosquitoes— Treat the outside surface of screens, doors, windows frames, foundations, putios or other places where incacts may enter. For ant hills and runways. Repeat when necessary. Do not spray vegetation.
